what is the difference between judging someone to be good and judging them to be kind both judgements are typically positive but the latter seems to offer more description of the person we get a more specific sense of what they are like very general evaluative concepts such as good bad right and wrong are referred to as thin concepts whilst more specific ones including brave rude gracious wicked sympathetic and mean are termed thick concepts in this volume an international team of experts addresses the questions that this distinction opens up how do the descriptive and evaluative functions or elements of thick concepts combine with each other are these functions or elements separable in the first place is there a sharp division between thin and thick concepts can we mark interesting further distinctions between how thick ethical concepts work and how other thick concepts work such as those found in aesthetics and epistemology how if at all are thick concepts related to reasons and action these questions and others touch on some of the deepest philosophical issues about the evaluative and normative they force us to think hard about the place of the evaluative in a seemingly nonevaluative world and raise fascinating issues about how language works

than a mistake the possibility of moral thought and judgement does not in any way depend on an adequate supply of principles dancy grounds this claim on a form of reasons holism holding that what is a reason in one case need not be any reason in another and maintaining that moral reasons are no different in this respect from others he puts forward a distinctive form of value holism to go with the holism of reasons and he gives a detailed discussion much needed of the currently popular topic of contributory reasons opposing positions of all sorts are summarized and criticized ethics without principles is the definitive statement of particularist ethical theory and will be required reading for all those working on moral philosophy and ethical theory
