the new york times science bestseller from robert wachter modern healthcare s 1 most influential physician executive in the us while modern medicine produces miracles it also delivers care that is too often unsafe unreliable unsatisfying and impossibly expensive for the past few decades technology has been touted as the cure for all of healthcare s ills but medicine stubbornly resisted computerization until now over the past five years thanks largely to billions of dollars in federal incentives healthcare has finally gone digital yet once clinicians started using computers to actually deliver care it dawned on them that something was deeply wrong why were doctors no longer making eye contact with their patients how could one of america s leading hospitals give a teenager a 39 fold overdose of a common antibiotic despite a state of the art computerized prescribing system how could a recruiting ad for physicians tout the absence of an electronic medical record as a major selling point logically enough we ve pinned the problems on clunky software flawed
