centuries ago when penguins were first encountered by european explorers they were not thought to be birds but rather a fish like relative subsequent accumulation of knowledge has shown penguins to be an avian species with unrivaled aquatic attributes owing to a number of evolutionary adaptations shape change low drag ability to regulate buoyancy and extraordinary surface compliancy

from their featheration they are indeed the most extremely specialized diving bird having given up flight which otherwise is hugely advantageous to the benefit of underwater prowess such as speed maneuverability and an ability to exploit an extraordinary range of depths this flightlessness however also comes with costs that are substantial for a seabird such as the inability to cover large distances quickly in reaction to ephemeral prey and the energy needed to cope with moving through an aqueous environment which is more resistant than air for penguins the high energetic costs in exploiting the ocean environment thus makes them especially sensitive to changes in food availability or their access to their prey while a number of penguin books cover the natural history mainly of breeding aspects few address in much detail the incredible aquatic nature of these creatures a huge amount of information has been amassed over recent past decades thanks to dramatic advances in microelectronics bio logging and maturation of some long term studies of penguin life history this work represents an integration of all these data with charts maps and graphs along with richly illustrated photos by experts in the field

gathering some of the best writing on working with diversity this anthology honors a multiplicity of viewpoints as part of a larger evolutionary shift in expanding the planet s consciousness mikhael gorbachev describes diversity as a key factor in creating a new civilization anthropologist riane eisler proposes a partnership approach between men and women and suzie williams offers diversity based recipes for synergy
