the book contains hundreds of engaging class tested statistics exercises and detailed solutions that test students understanding of the material many are educational in their own right for example baseball managers who played professional ball were often catchers stocks that are deleted from the dow jones industrial average have generally done better than the stocks that replaced them athletes may not get hot hands but they often get warm hands with modest improvements in their success probabilities

originally published in 1986 this book consists of 100 problems in probability and statistics together with solutions and most importantly extensive notes on the solutions the level of sophistication of the problems is similar to that encountered in many introductory courses in probability and statistics at this level straightforward solutions to the problems are of limited value unless they contain informed discussion of the choice of technique used and possible alternatives the solutions in the book are therefore elaborated with extensive notes which add value to the solutions themselves the notes enable the reader to discover relationships between various statistical techniques and provide the confidence needed to tackle new problems

this book reports on cutting edge theories and methods for analyzing complex systems such as transportation and communication networks and discusses multi disciplinary approaches to dependability problems encountered when dealing with complex systems in practice the book presents the most noteworthy methods and results discussed at the international conference on reliability and statistics in transportation and communication relstat which took place remotely from riga latvia on october 14 17 2020 it spans a broad spectrum of topics from mathematical models and design methodologies to software engineering data security and financial issues as well as practical problems in technical systems such as transportation and telecommunications and in engineering education
