in the solution focused and strategic therapy field this is a landmark book the first to address all of the core and clinical competencies involved in running a practice including learning and applying a conceptual map developing and maintaining an effective therapeutic alliance and intervention planning with the patience of an experienced teacher and knowledge of a master therapist dr ellen quick shows how to move from minimal competency to higher levels of proficiency she addresses therapists from all of the behavioral health care disciplines and teaches them to tailor treatment to their clientsâ€™ unique strengths and proficiencies discover and amplify what works and change what doesnâ€™t dr quick presents the essential knowledge skills and attitudinal components of each competency with an emphasis on demonstrating their applications in actual clinical practice readers will appreciate that by the end of the book they will not only be able to demonstrate competence which is a critical component of an evidence based practice but will also be excited to build proficiency in areas of special interest and expertise the lessons learned in this book will allow readers to continue to advance their competency skills long after they have put it down

benjamin a valentino finds that ethnic hatreds or discrimination undemocratic systems of government and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed he shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society mass killing in his view is a brutal political or military strategy designed to accomplish leaders most important objectives counter threats to their power and solve their most difficult problems in order to capture the full scope of mass killing during the twentieth century valentino does not limit his analysis to violence directed against ethnic groups or to the attempt to destroy victim groups as such as do most previous studies of genocide rather he defines mass killing broadly as the intentional killing of a massive number of noncombatants using the criteria of 50 000 or more deaths within five years as a quantitative standard final solutions focuses on three types of mass killing communist mass killings like the ones carried out in the soviet union china and cambodia ethnic genocides as in armenia nazi germany and rwanda and counter guerrilla campaigns including the brutal civil war in guatemala and the soviet occupation of afghanistan valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing
