fact fluency matters but timed tests give students more anxiety than they develop students mathematical fluency it s time for educators to give timed tests a time out but what s the alternative this book is designed to answer that question it provides teachers with a wealth of practical ways to teach students the facts help them understand the facts and give them strategies to become fluent with their grade level s fact fluency expectations time s up on timed tests builds real fact fluency without a timer the book covers fluency in addition subtraction multiplication and division with practical strategies for purposeful practice including reproducibles of games and activities

humans process quantity information without the aid of language or symbols to guide a variety of everyday life decisions the cognitive system that supports this intuitive skill is often referred to as the approximate number system ans it has been argued that the ans serves as the foundation of the formal symbolic number system mathematics abundant empirical evidence is supportive of this view acuity of the ans is positively correlated with symbolic math performance training of the ans may cause improvements in symbolic math performance and the ans and symbolic

number processing may share a common neural underpinning however recently several theories and empirical data cast doubt on the role of the ans in symbolic math processing this e book aims to advance our understanding of the underlying mechanisms of the overlap between the ans and mathematics

online resources are open access no code is required it is vital to understand the challenges and provide the right support for learners with dyscalculia and specific learning difficulties in mathematics the book provides an overview of current research explaining the nature and causation of dyscalculia guidance on the identification of dyscalculia examples of how to carry out informal and formal assessments an explanation of the principles of multisensory mathematics teaching an outline of a structured programme for learners aged 5 14 together with examples of lesson planning and activities designed for teachers specialising in the assessment and teaching of learners with dyscalculia and those undertaking courses leading to approved teacher dyscalculia atd and associate membership of the british dyslexia association ambda the book is useful to any professional looking for an understanding of this area of specific difficulty

this work focuses on the field of early years research it argues that the educational research community has blossomed in the uk in recent years with the growth of higher degrees and practitioner research within this area

growing mathematical minds is the documentation of an innovative bi directional process of connecting research and practice in early childhood mathematics the book translates research on early mathematics from developmental psychology into terms that are meaningful to teachers and readily applicable in early childhood classrooms it documents teacher responses and conveys their thoughts and questions back to representative researchers who reply in turn in so doing this highly useful book creates a conversation in which researchers and teachers each bring their expertise to bear their communication about these topics informed by the thinking commitment and experience of both groups helps us better understand how developmental psychology can improve math teaching and how math teaching can in turn inform developmental science the book bridges the gap between research and practice helping teachers to adopt evidence based practices and apply cutting edge research findings and prompting developmental researchers to consider their work within the framework of practice growing mathematical minds identifies and

elucidates research with profound implications for teaching children from three to eight years so they develop foundational math knowledge and skills positive attitudes toward math and basic abilities to think mathematically
