Basic Statistics Exercises And Answers Basic Statistics Exercises and Answers A Guide to Mastering the Fundamentals Statistics is an essential tool in many fields from business and finance to healthcare and social sciences Understanding basic statistical concepts and methods allows you to make informed decisions interpret data effectively and communicate findings clearly This article provides a comprehensive guide to fundamental statistics exercises with detailed answers helping you solidify your understanding and build a strong foundation

Part 1 Descriptive Statistics

1 Measures of Central Tendency

Exercise 1 Calculate the mean median and mode for the following set of data 10 12 15 18 18 20 22 25
Answer Mean $\frac{10 + 12 + 15 + 18 + 18 + 20 + 22 + 25}{8} = 17.5$ Median Arrange the data in ascending order 10 12 15 18 18 20 22 25 The median is the average of the two middle numbers $\frac{18 + 18}{2} = 18$ Mode The most frequent number in the dataset is 18

Exercise 2 Explain the difference between the mean median and mode and discuss when each measure is most appropriate to use
Answer Mean The average of all values in the dataset It is sensitive to outliers extreme values It is appropriate for data that is symmetrical and without outliers Median The middle value in a sorted dataset It is not affected by outliers It is appropriate for skewed data or when outliers are present Mode The most frequent value in a dataset It is appropriate for categorical data or when you want to identify the most common value

2 Measures of Dispersion

Exercise 3 Calculate the range variance and standard deviation for the following set of data 10 12 15 18 18 20 22 25
Answer Range Highest value - Lowest value $25 - 10 = 15$ Variance 1 Calculate the mean 17.5 2 Subtract the mean from each value and square the result $10^2 - 17.5^2 = 56.25$ $12^2 - 17.5^2 = 30.25$ etc 3 Sum up the squared differences $56.25 + 30.25 + 56.25 + 210 = 352.5$ 4 Divide the sum by $n-1$ where n is the number of values $\frac{352.5}{7} = 50.357$ Standard Deviation The square root of the variance $\sqrt{50.357} = 7.1$

Exercise 4 What does the standard deviation tell us about a dataset
Answer The standard deviation measures the spread of data points around the mean A higher standard deviation indicates greater variability in the data while a lower standard deviation indicates less variability

3 Visualizing Data

Exercise 5 Create a histogram and a box plot for the following set of data 10 12 15 18 18 20 22 25
Answer Histogram The histogram will show the frequency distribution of the data The xaxis will be the data values and the yaxis will be the frequency The bars will represent the number of values in each data range Box plot The box plot will show the median quartiles and outliers of the data The box will represent the interquartile range IQR and the whiskers will extend to the minimum and maximum values within 1.5 times the IQR

Part 2 Probability and Distributions

1 Basic Probability

Exercise 6 A bag contains 5 red balls 3 blue balls and 2 green balls What is the probability of picking a blue ball at random
Answer Total number of balls $5 + 3 + 2 = 10$ Number of blue balls 3 Probability of picking a blue ball $\frac{3}{10} = 0.3$

Exercise 7 Explain the difference between independent and dependent events
Answer Independent events The occurrence of one event does not affect the probability of the other event occurring Example Flipping a coin twice Dependent events The occurrence of one event affects the probability of the other event occurring Example Drawing two cards from a deck without replacement

2 Discrete Probability Distributions

Exercise 8 A fair coin is flipped 5 times What is the probability of getting exactly 3 heads
Answer This follows a binomial distribution with $n=5$ number of trials $k=3$ number of successes and $p=0.5$ probability of success on each trial The probability is calculated as $5C3 \cdot 0.5^3 \cdot 0.5^2 = 0.3125$

Exercise 9 Explain the properties of a Poisson distribution
Answer The Poisson distribution models the probability of a certain number of events occurring within a fixed interval of time or space Its key properties include The events occur independently of each other The average rate of events is constant The probability of observing an event in a small interval is proportional to the length of the interval

3 Continuous Probability Distributions

Exercise 10 The heights of adult males in a certain population are normally distributed with a mean of 175 cm and a standard deviation of 5 cm What is the probability that a randomly selected adult male is taller than 180 cm
Answer This involves using the standard normal distribution First convert 180 cm to a zscore $\frac{180 - 175}{5} = 1$ Look up the zscore in a standard normal distribution table or use a calculator to find the probability that a zscore is greater than 1 which is approximately 0.242

Exercise 11 Explain the difference between a uniform distribution and an exponential distribution
Answer 4 Uniform distribution Each value within a given interval has an equal probability of occurrence Exponential

distribution This distribution models the time between events occurring in a Poisson process It is characterized by a decreasing probability of events occurring over time

Part 3 Inferential Statistics

1 Hypothesis Testing

Exercise 12 A researcher wants to test the hypothesis that the average height of women in a certain city is 165 cm A sample of 100 women is taken and the sample mean is found to be 167 cm Assuming a population standard deviation of 4 cm perform a hypothesis test at a 5 significance level

Answer Null hypothesis H_0 The average height of women in the city is 165 cm Alternative hypothesis H_1 The average height of women in the city is not 165 cm Test statistic z sample mean hypothesized mean standard deviation sample size 167 165 4 100 5 Pvalue The pvalue is the probability of observing a sample mean as extreme as 167 cm if the null hypothesis is true Using a ztable the pvalue for a twotailed test is less than 00001 Conclusion Since the pvalue is less than the significance level of 005 we reject the null hypothesis and conclude that there is sufficient evidence to suggest that the average height of women in the city is not 165 cm

Exercise 13 Explain the difference between a Type I error and a Type II error in hypothesis testing

Answer Type I error false positive Rejecting the null hypothesis when it is actually true Type II error false negative Failing to reject the null hypothesis when it is actually false

2 Confidence Intervals

Exercise 14 A sample of 25 students is taken from a large university The average GPA of the sample is 32 with a standard deviation of 04 Construct a 95 confidence interval for the average GPA of all students at the university

Answer Confidence level 95 5 Sample mean 32 Sample standard deviation 04 Sample size 25 Critical value For a 95 confidence level the critical value from the tdistribution with 24 degrees of freedom is approximately 2064 Margin of error Critical value standard deviation sample size 2064 04 25 0165 Confidence interval Sample mean Margin of error 32 0165 3035 3365 Conclusion We are 95 confident that the true average GPA of all students at the university lies between 3035 and 3365

Exercise 15 What is the relationship between confidence level and the width of the confidence interval

Answer Higher confidence levels lead to wider confidence intervals This is because a higher confidence level requires a larger margin of error resulting in a wider range of values that could contain the true population parameter

Conclusion This comprehensive guide has provided a thorough exploration of basic statistics exercises and their answers covering key concepts in descriptive statistics probability and inferential statistics By working through these exercises you have gained a deeper understanding of how to interpret data conduct statistical analyses and make informed decisions based on evidence Remember statistics is a powerful tool that can be used to gain insights make predictions and improve our understanding of the world around us Continue practicing and applying these fundamental concepts to further enhance your statistical proficiency
