provides information on career opportunities for people who enjoy books

the only career series designed expressly to turn passions into paychecks the careers for you series inspires career explorers to look at the job market through the unique lens of their own interests each book reveals dozens of ways to pursue a passion and make a living including many little known but delightful careers that will surprise readers

from donna g corwin the bestselling co author of time out for toddlers parent traps is an insightful book that helps parents explore experiences from their own childhoods to help them better understand their own parenting styles with helpful solutions and psychological tools parent traps can help you navigate the dilemmas that all parents face

includes beginning sept 15 1954 and on the 15th of each month sept may a special section school library journal issn 0000 0035 called junior libraries 1954 may 1961 also issued separately

the basic magazine in a basic industry

benjamin just can t resist a sneaky read when he s supposed to be doing maths however benjamin has to pinch himself when he faces shamus and pat two real bookworms then there s the tooth fairy

in markets from networks one of america s most influential sociologists unveils a groundbreaking theory of the market economy arguing that most economists use overly abstract models of how the economy operates harrison white seeks a richer more empirically based alternative in doing so he offers a more lucid generalized treatment of the market models described in his important earlier work in order to show how any given market is situated in a broader exchange economy white argues that the key to economic action is that producers seek market niches to maximize profit and minimize competition as they do so they base production decisions not only on anticipated costs from suppliers and anticipated demand from buyers but also by looking at their competitors in fact white asserts producers act less in response to actual demand than by anticipating it they gauge where competitors have found demand and thus determine what they can do that is similar and yet different enough to give themselves a special niche building on these and related insights white creates new mathematical models of how the economy works and how the interaction of its sectors creates mutual protection from the uncertainties of business these models provide new ways of accounting for profits prices market shares

and other vital economic phenomena he shows for example that prices are determined by the coalescing of local variables rather than set in terms of averages as implied by the law of supply and demand the model of pure competition favored by economics is deficient he concludes as it fails to account for the varied circumstances of particular industries throughout white draws extensively on case studies of american businesses and on recent mathematical and sociological work on networks rivaling standard economic theories with its rich empirical grounding sheer originality and scholarly rigor markets from networks will resonate in economics and economic sociology for years to come
