Data Privacy and Security

Transparency

Transparency in how student data is collected, used, and stored is paramount. Students, parents, and educators should be informed about data collection practices and have the right to access and control their data.

Data Minimization

Only essential data should be collected for the purpose of personalized learning, and it should be anonymized whenever possible.

Secure Storage

Data should be stored securely and protected from unauthorized access or breaches.

Bias and Fairness

Algorithm Auditing

Regular audits of AI algorithms used in education are necessary to identify and mitigate potential biases. This involves examining training datasets and evaluating the algorithms' performance across diverse student populations.

Diverse Training Data

AI algorithms should be trained on diverse datasets that reflect the real-world diversity of students. This helps reduce the risk of biased outcomes.

Human Oversight

AI-powered tools should not replace human educators entirely. Educators play a vital role in interpreting AI-generated insights and ensuring equitable learning opportunities for all students.

Digital Divide and Accessibility
