violence is so much in the news today that we may find it hard to believe that it is less prevalent than it was in the past but this is exactly what the distinguished historian robert muchembled argues in this major new work on the history of violence he shows that brutality and homicide have been in decline since the thirteenth century the thesis of a civilizing process of a gradual taming even sublimation of violence seems therefore to be well founded how are we to explain this decline in public displays of aggression what mechanisms have modernizing societies employed to repress and control violence the increasingly strict social control of unmarried male adolescents together with the coercive education imposed on this age group are central to muchembled s explanation masculine violence gradually disappeared from public space to become concentrated in the home meanwhile a vast popular literature precursor of the modern mass media came to play a cathartic role the duels of the three musketeers and the amazing exploits of fantômas as described in the new crime literature invented in the nineteenth century now helped to purge the violent impulses and yet we seem in the first few years of the twenty first century to be witnessing a resurgence of violence especially among the youths of the inner cities how should we understand this resurgence in relation to the long history of violence in the west

violence is among the foremost social problems confronting human beings in democratic societies particularly in the united states the problem of violence extends beyond its expression as a criminal justice or a public health or a human rights issue requiring a holistic integrated understanding of various perspectives as well as a critical consideration of approaches and solutions the second edition of why violence not only covers age old questions such as why some human beings under certain circumstances react in violent or aggressive ways and others do not and why some social forces institutions tend to encourage or exacerbate violence and others do not the book also treats questions conventionally not associated with violence for instance why are public policies or official actions associated with evidence of social injustice and violation of human rights such as mass incarceration homelessness environmental

degradation and gross abuse of power not considered violence per se in this sense the book serves to fill a gap in the literature by raising not only the enduring questions of violence but also new questions about the conceptualization and reality of violence the second edition of why violence offers a significantly enhanced treatment of the complexities and controversies surrounding the problem of violence with special emphasis on violence as a violation of democratic constitutional values and principles threatening human beings living in democratic societies today the book advances the idea that in addition to rhetorical affirmation of democratic ideals a greater demonstrable commitment to and compliance with democratic and constitutional rights and values including acknowledgement of the antithetical relationship between violence and democracy and a commitment to nonviolence is arguably the most effective preventive measure against the threat of violence in our contemporary world the book begins with the question why violence and ends with the question why not peace drawing upon criminology sociology anthropology psychology political science economics history philosophy and law why violence brings together state of the art thinking and associated research knowledge base on violence it provides a critical analysis of the interplay between popular questions of why there is a disconnect between the public's understanding of violence including official responses to violence and scientific evidence the most current theories and research evidence from interdisciplinary viewpoints are presented and critically considered with respect to their relative strengths and weaknesses and potential for finding solutions to the problem of violence the teacher's manual in 3 parts manual multi choice questions and true false questions is available electronically or via email please contact beth hall at bhall@cap.press.com to request a copy and please specify whether you need materials in pdf or word format powerpoint slides are available to professors upon

this book offers a philosophical account of violence engaged with both empirical and theoretical debates in disciplines such as cognitive science sociology psychiatry anthropology political theory evolutionary biology and theology the primary thesis is that violence is intertwined with morality and typically enacted for moral reasons to show this the book compellingly demonstrates how morality operates to trigger and justify violence and how people in their violent behaviors can engage and disengage with discrete moralities the author s fundamental account of language and in particular its normative aspects is particularly insightful as regards extending the range of what is to be understood as violence beyond the domain of physical harm by employing concepts such as coalition enforcement moral bubbles cognitive niches overmoralization and military intelligence the book aims to spell out how

perpetrators and victims of violence systematically disagree about the very nature of violence the author's original claim is that disagreement can be understood naturalistically described by an account of morality informed by evolutionary perspectives as well this book helps us come to terms with the fact that we are intrinsically violent beings to acknowledge this condition and our stupefying capacity to inflict harm is a responsibility we must face up to such understanding could ultimately be of help in order to achieve a safer ownership of our destinies by individuating and reinforcing those cognitive firewalls that would prevent violence from always escalating and overflowing this second edition is thoroughly revised and integrated with two new chapters to cover new aspects of violence and its understanding such as the role of looting finance in facilitating violent outcomes and the attack to scientific cognition and human creativity

violence has long been noted to be a fundamental aspect of the human condition traditionally however philosophical discussions have tended to approach it through the lens of warfare and or limit it to physical forms this changed in the twentieth century as the nature and meaning of violence itself became a conceptual problem guided by the contention that walter benjamin's famous 1921 critique of violence essay inaugurated this turn to an explicit questioning of violence this collection brings together an international array of scholars to engage with how subsequent thinkers agamben arendt benjamin butler castoriadis derrida fanon gramsci merleau ponty sartre and schmitt grappled with the meaning and place of violence the aim is not to reduce these multiple responses to a singular one but to highlight the heterogeneous ways in which the concept has been inquired into and the manifold meanings of it that have resulted to this end each chapter focuses on a different approach or thinker within twentieth and twenty first century european

philosophy with many of them tackling the issue through the mediation of other topics and disciplines including biopolitics epistemology ethics culture law politics and psychoanalysis as such the volume will be an invaluable resource for those interested in critical theory cultural studies history of ideas philosophy politics political theory psychology and sociology

alcohol and aggression do countries outside the united states have alcohol and violence problems and do these impact men and women differently we presents original research that shows the depths and conditions under which alcohol and violence are linked further strengthening the evidence that alcohol use and availability is an important factor in violence in our cities neighborhoods school and homes the good news is that we regulate alcohol use and availability effectively with a body of established laws and procedures we can therefore find ways using this existing system to develop new ways to prevent the alcohol related violence studied here the second half of the book begins this task by laying out the principles of environmental prevention a strategy that has been very successful in a number of health and safety related domains the next four chapters show just how environmental prevention strategies have worked and worked very effectively to lower rates of violence by reducing alcohol availability and alcohol consumption the research reported here shows communities different approaches and mechanisms to achieve reductions in violence and they provide a road map for communities everywhere to follow suit and reduce alcohol related violence reducing violence can be accomplished everyone can do it if they work together and the result is a safer and better society
