the discovery of america vol 1 by john fiske the present work is the outcome of two lines of study pursued with more or less interruption from other studies for about thirty years it will be observed that the book has two themes as different in character as the themes for voice and piano in schubert s frühlingsglaube and yet so closely related that the one is needful for an adequate comprehension of the other in order to view in their true perspective the series of events comprised in the discovery of america one needs to form a mental picture of that strange world of savagery and barbarism to which civilized europeans were for the first time introduced in the course of the fifteenth and sixteenth centuries in their voyages along the african coast into the indian and pacific oceans and across the atlantic nothing that europeans discovered during that stirring period was so remarkable as these antique phases of human society the mere existence of which had scarcely been suspected and the real character of which it has been left for the present generation to begin to understand nowhere was this ancient society so full of instructive lessons as in aboriginal america which had pursued its own course of development cut off and isolated from the old world for probably more than fifty thousand years the imperishable interest of those episodes in the discovery of america known as the conquests of mexico and peru consists chiefly in the glimpses they afford us of this primitive world it was not an uninhabited continent that the spaniards found and in order to comprehend the course of events it is necessary to know something about those social features that formed a large part of the burden of the letters of columbus and vespucci and excited even more intense and general interest in europe than the purely geographical questions suggested by the voyages of those great sailors the descriptions of ancient america therefore which form a kind of background to the present work need no

apology we are delighted to publish this classic book as part of our extensive classic library collection many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public the aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades the contents of the vast majority of titles in the classic library have been scanned from the original works to ensure a high quality product each title has been meticulously hand curated by our staff our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work we hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience

the code of federal regulations is the codification of the general and permanent rules published in the federal register by the executive departments and agencies of the federal government

there are three men whose contributions helped free science from the straitjacket of theology two of the three nicolaus copernicus and charles darwin are widely known and heralded for their breakthroughs the third james hutton never received the same recognition yet he profoundly changed our understanding of the earth and its dynamic forces hutton proved that the earth was likely millions of years old rather than the biblically determined six thousand and that it was continuously being shaped and re shaped by myriad everyday forces rather than one cataclysmic event in this expertly crafted narrative jack repcheck tells the remarkable story of this scottish gentleman farmer and how his simple observations on his small tract of land led him to a theory that was in direct confrontation with the bible and that also provided the scientific proof that would spark darwin s theory of evolution it is also the story of scotland and the scottish enlightenment which brought together some of the greatest thinkers of the age from david hume and adam smith to james watt and erasmus darwin finally it is a story about the power of the written word repcheck argues that hutton s work was lost to history because he could not describe his findings in graceful and readable prose unlike darwin s origin of the species hutton s one and only book was impenetrable a marvelous narrative about a little known man and the science he founded the man who found time is also a parable about the power of books to shape the history of ideas

titles of chemical papers in british and foreign journals included in quarterly journal v 1 12
