in april 1993 an interdisciplinary nato advanced research workshop on collaborative dialogue technologies in distance learning was held in segovia spain the workshop brought together researchers in fields related to distance learning using computer mediated communication the statement of justification of the nato arw follows hereafter justification of the nato advanced research workshop on collaborative dialogue technologies in distance learning

computer mediated communication cmc systems have features that reduce some temporal physical and social constraints on communication theories of communication have shifted from viewing communication as a linear transmission of messages by a sender to a receiver to viewing it as a social paradigm where individuals are actors in a network of interdependent relationships embedded in organizational and social structures recent research focuses on models of information sharing to support not only the activities of individuals but also the problem solving activities of groups such as decision making planning or co writing this area of research is called computer supported cooperative work cscw the artificial intelligence ai approach uses knowledge based systems to enhance and facilitate all these processes including the possibility of using natural language the traditional model of distance education places a strong emphasis on independent study supported by well developed learning materials this model can be characterized as one way media however the potential of cmc to provide better guidance to the student in higher distance education has been quickly recognized for at least two kind of activities information sharing and interaction
