this book argues that the no marxists mostly have it wrong although corporate media are structurally organized to maximize profits and produce content that generally helps elites achieve their goals this does not mean corporate media have less capacity to facilitate social change than entrepreneurial or other forms of media in fact historical evidence and comparative critical studies presented in this book show that mass media become more not less critical of dominant power groups institutions and value systems as they become more corporatized this proposition is part of a larger theoretical model that integrates the role of both social structure and human agency in explaining the persistence of modern capitalism the structural part of the theory also enables scholars to make predictions about the future of mass media including the ideas that the internet is stealing some of the mediating power of traditional mass media and the market power of global media will grow in absolute terms but will shrink in relative terms because of increasing competition from new and traditional media

the literature on mass communication is now dominated by objective sociological approaches what makes the work of stephenson so unusual is his starting points his frank willingness to adopt a subjective and psychological approach to the study of mass communication in short this is an internal analysis of how communication processes are absorbed by individuals the theory of play is not a doctrine of frivolity but rather a way in which stephenson gets at such sensitive areas of communication theory as what is screened out and why without a notion of the play element in communication one would be led to imagine that every televised docudrama would be immediately lived out by every adolescent clearly this is not the case people can distinguish quite well between imaginary and real events in mass communication contexts the play theory of mass communication is a work that studies subjective play how communication serves the cause of self enhancement and personal pleasure and the role of entertainment as an end in itself in short for those who are tired of cliché ridden volumes on the political hidden messages and meanings of communication or the economic management of media decisions this volume will come as a refreshment a piece of entertainment as well as instruction but with all the emphasis on aspects stephenson s volume is shrewdly political he takes up themes ranging from the reduction of international tensions to the happily alienated worker to such pedestrian events as the reporting of foreign soviet dignitaries in their visits to democratic cultures this is in short an urbane wise book sophisticated in its methodology and critical in its theorizing
