this book investigates both the causes and effects of transnational activities among immigrants in relation to their integration into the receiving society it uses large scale representative data about first and second generation immigrants in germany it develops a formal theoretical model which explains both transnational involvement and paths of immigrant integration important questions are answered what consequences does transnational involvement have on integration is transnational involvement a distinct form of integration is it an alternative to assimilation does it hinder or facilitate assimilation longitudinal analyses are presented which show that immigrant integration and transnational involvement do not necessarily oppose each other the book shows that although low levels of integration may coincide with strong transnational ties the relationship is not causal this book shows how immigrant integration and transnational involvement are related to each other and how a joint examination of both processes may advance our understanding of the general dynamics of migration and integration

this collection of selected essays by werner j cahnman brings together out of scattered dispersion his writings about max weber ferdinand toennies and historical sociology the great theoretical range and depth of his intellect and mastery of sociological thinking is apparent as he discusses the impact of romanticism on modern thought and how weber and toennies both analyzed and reacted to modernity cahnman places weber 1864 1920 the dominant figure in twentieth century sociology in the midst of the methodological controversies so characteristic of contemporary social science and he fully discusses the overarching importance of weberian ideal type theory although less well known than weber toennies 1855 1936 was also a sociologist of the first rank he is best remembered for his enormously influential twin concepts gemeinschaft and gesellschaft which contributed to our understanding of the historical and sociological basis for the change from premodern to modern societies the essays in this volume establish toennies intellectual connections to karl marx max weber emile durkheim and herbert spencer and clarify his influence upon american sociology cahnman stood against strict separations between history and sociology and his essays are all informed by a wonderful admixture of the theoretical and the concrete they demonstrate how a genuine historical sociology not unlike that of weber and toennies can find and explain linkages between seemingly disparate events spanning time and place this volume will be of interest to sociologists political scientists and intellectual historians
