excerpt from the principles of moral science an essay in this book i have endeavoured to state in language as clear and simple as the subject permits the principles of ethics that have been handed down by a tradition of many centuries in the catholic schools of theology and philosophy i shall not be surprised to find the success of the attempt questioned and denied by many if not most of those who have spent the best part of their lives in the study of the great catholic writers on morals i admit nay claim that some important conclusions at which i have arrived differ from those of the ordinary hand books on human acts laws and conscience and are not to be found in any published treatise with which i am acquainted if it were otherwise i should not have thought of writing or publishing very soon after i began to teach moral theology i noticed a considerable difference between the principles of the science as explained in the treatise on human acts and the less general conclusions reached later on when dealing with particular virtues as time advanced this difference seemed to increase rather than diminish and i resolved to try whether i could not formulate the principles so that while perfectly reasonable in them selves and breathing the spirit of the school they might stand the test of being brought into comparison with all the less general and therefore more easily ascertained conclusions of moral science unless forced by what i deem compelling reasons i have not ventured to advocate a new form of statement the reader must decide for himself whether the reasons that appeal to me so strongly are as conclusive as i deem them about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy
