interest in economics is at an all time high among the challenges facing the nation is an economy with rapidly rising unemployment failures of major businesses and industries and

continued dependence on oil with its wildly fluctuating price economists have dealt with such questions for generations but they have taken on new meaning and significance tackling these questions and encompassing analysis of traditional economic theory and topics as well as those that economists have only more recently addressed 21st century economics a reference handbook is a must have reference resource key features provides highly readable summaries of theory and models in key areas of micro and macroeconomics helpful for students trying to get a big picture sense of the field includes introductions to relevant theory as well as empirical evidence useful for readers interested in learning about economic analysis of an issue as well for students embarking on research projects features chapters focused on cutting edge topics with appeal for economists seeking to learn about extensions of analysis into new areas as well as new approaches presents models in graphical format and summarizes empirical evidence in ways that do not require much background in statistics or econometrics so as to maximize accessibility to students

over recent years nature based solutions nbs have gained popularity as tools to ameliorate the effects of climate change while slowing down the global warming process more specifically the potential of nbs has been explored in terms of meeting greenhouse gas emissions targets and fostering climate change adaptation nbs are methods that use and enhance nature to improve social and environmental challenges they involve several multifaceted actions that work sustainably to restore and protect the natural environment while helping people therefore these solutions are useful in climate change adaptation and mitigation there are 3 main areas which nbs may target namely reducing exposure reducing sensitivity and supporting adaptive capacity reducing exposure refers to protecting areas from existing climate change effects there is thus a perceived need to document and promote experiences related to nbs and to apply these in different contexts it is against this background that the handbook of nature based solutions to mitigation and adaptation to climate change is being produced the publication will showcase experiences related to nbs from around the world in particular it will gather examples of projects studies and the latest thinking on nbs which can serve the purpose of inspiring and fostering further works in this key area thanks to its scope and thematic diversity the book will be of special interest to representatives from government organisations researchers and students from a wide range of natural and social sciences courses it will also provide useful information to practitioners and representatives from non governmental organisations

the book includes the author s most important work on a variety of topics including the hotelling model of spatial competition as applied to resource economics jurisdictional tax competition particularly in the context of resource taxes and environmental regulation both theoretical and empirical

the connection between economic growth and the quality of the environment is a popular subject since the second half of the 1980s there has been an increasingly frequent use of

the term sustainable development to refer to the preoccupation that the production of goods and services may decrease standards of living it is natural to analyze this question from the point of view of economic models which may be helpful in at least identifying the main factors behind such preoccupations and perhaps in suggesting policy measures indeed models are useful to discuss some relevant factors like the structure of production of the economy the type of preferences and goals pursued by agents and the elements of uncertainty this monograph will consider some of these themes there will be a study of the analytical framework which can be used for the purpose of defining and analyzing sustainability and some discussion of how to calibrate a restricted version of the model to empirical data there will be also some analysis about which type of uncertainty should be incorporated into the model and which objective functions may be useful for policy purposes also there will be discussions about the key variables which should be included and some description of a general framework

natural resource and environmental economics provides a modern comprehensive and clear and authoritative introduction to the economic analysis to environmental issues

the consequences of climate change for society are analysed in this landmark assessment from the ipcc this book assesses the available knowledge on the many issues that society has to face including the international decision making framework applicability to climate change of techniques for assessing costs and benefits the significant social costs of projected climate change and the economic assessment of policy instruments to combat climate change nationally and internationally some important conclusions of this second assessment report indicate that 10 to 30 of greenhouse gas emissions in most countries can be reduced at negative or zero cost no regrets measures also the literature indicates that climate change will cause aggregate net damage which provides an economic rationale for going beyond no regrets measures it also indicates that a portfolio of mitigation adaptation and research measures is a sound strategy for addressing climate change given the remaining uncertainties this report speaks directly to the issues that are faced by the many countries committed to limit emissions of greenhouse gases by the year 2000 and currently negotiating actions to be taken beyond that date will be of great value to the international community of policymakers interested in the consequences of climate change as well as to economists social and natural scientists

includes annual list of doctoral dissertations in political economy in progress in american universities and colleges and the hand book of the american economic association

this outstanding new collection surveys the relationship between the environment and development and highlights some of the tensions that are implicit in the notion of sustainable development environmental economics and development is organized into six sections general aspects resource utilization and management valuation and accounting of environmental change environmental policy instruments adjustment trade and the

environment and distributional issues these areas include general features of environment development interfaces operational valuation and accounting methods and economic approaches to environmental policy instruments in developing countries and in the international context
