first published in 2005 the central issue of our times is the unequal income of nations its importance outweighs most of the domestic problems in rich countries and the division of the world into rich and poor has become more significant than the ideological cleavage between communism and capitalism there are twenty five rich countries but more than 100 countries who are in the where income range two thirds of the world s population live in the latter group this study focuses on those countries and looks at economic policy and progress

this reissue first published in 1969 is a study of contemporary social policy in developing countries which places the emphasis upon the human needs and requirements for social change which confront any people and any government wherever their political and international affiliations lie whatever their economic and social convictions may be

what is a developing country how does one know whether a country is actually developing or not this book looks at this issue from several perspectives using a series of reports by various organisations it shows how countries rank in their levels of development according to different criteria countries ranking high according to one measure may rank lower according to another it was once commonly believed that raising a country's average per capita income level would lead to improvements in most other areas time and experience have shown however that social conditions and general well being of people may not necessarily improve when a country's average income level increases countries with high levels of per capita income may rank lower in their social and structural development by contrast some poor countries rank with the advanced countries in their governance and levels of individual and economic freedom this book examines four criteria which are often used today to rank and assess countries levels of development they are per capita income economic and social structure social conditions and the prevailing level of economic and political freedom specific indices or quantitative studies are explained and applied to each criteria and differences among the various measures are explained

the textbook experience of poverty can be witnessed in a number of developing countries in sub saharan africa south east asia and latin america accordingly foreign direct investment fdi has been identified as an important tool for poverty reduction as it is noted to accelerate economic growth and employment in a nation and is currently an essential issue for countries such as uganda this book finds that ragnar's 1953 vicious circle of poverty remains undisputed even today showing that attracting fdi is not the end but that a nation's absorption capacity is equally paramount the implications of the fdi frog leap theory for developing countries and the community capital absorption capacity development ccacd framework provide plausible poverty reduction approaches in the 21st century without such measures bringing an end to poverty is likely to elude governments and multinational corporations in developing countries

this paper analyzes the impact of globalization on developing countries over the last several decades the first section examines the components and mechanisms of globalization the second turns to financial globalization and looks in more detail at the changing trends in finance for developing countries the third section analyzes the impact of the new pattern of finance in terms of growth equity and government autonomy the concluding section offers policy recommendations for making globalization a more positive force

the developing countries and the world economic order provides a lucid introduction to the debate about the developing countries and the quest for a new international economic order the primary objective is to indicate some of the fundamental requirements that must be satisfied by an equitable world order since the present economic situation and demands of developing countries cannot be understood thoroughly without prior knowledge of how the present world order has evolved part i begins with a detailed historical survey an account of economic development up to the second world war and of the colonial heritage of the

developing countries is followed by a description of the way in which the postwar world order came into being part ii analyses more recent developments including the central demands of developing countries and the background to these demands and outlines a new perspective on the nio programme with suggestions are offered on how the developing countries could secure for themselves a larger share of the world's resources a major theme of the book is that important changes in the world order take place irrespective of the recommendations adopted at international conferences

for those wishing to acquire knowledge on national development issues this comprehensive compendium traverses a spectrum of subjects that the audience ought to be well acquainted with the editors provide instructive findings regarding national development economic growth and their determinants but they also offer historical perspectives on the subject and the implications for developing countries the book addresses a suite of critical themes regarded by development experts to be germane in considering the pertinence of policies and their effective execution these seven general thematic areas are explored leadership governance policy and strategy public sector and public financial management culture institutions and people natural resources science technology and infrastructure private sector and financial markets marketing branding and service delivery this thematic approach enables the contributors to explore the impact of the constituents of each subject area on national development within the context of a developing economy the significance of the findings for the relevant stakeholders is consequently reviewed the combination of theory and practice makes the book and its contents unique

differences in the choices of trade and macro policies both by developing countries and by developed countries towards developing countries have been critical in determining the overall performance of developing countries all too often the performance of developing countries has not been assessed using appropriately conducted studies the papers in this book are chosen to bridge this gap and show how a quantitative approach to policy evaluation can help resolve controversies and explain the choice of observed policies the book brings together carefully selected papers that assess the impacts of various trade and macro policies by quantifying the policies of developing countries at the macro level exchange rate investment savings and at the sector level trade and industrial policies in addition to policies of developed countries towards developing countries trade preferences quotas vers and migration policies facets of the political economy of trade migration and climate policies are explored such as the enlargement of the eu the rise of regionalism and how it can ease the pains of adjustment to trade liberalization openness and inequality growing tensions between trade and the environment are also investigated in short this book covers a wide area of events ranging from external and internal shocks to external and internal policies showing how the consequences of these events can be brought to rigorous quantitative analysis

developing countries the united states has not fully funded its share of debt relief and the impact of debt relief on countries poverty reducing spending is unknown report to congressional requesters

first published in 1978 this book was written at a time when belief was high in western guided economic development of the emerging countries the success of marshall plan in war torn europe generated a us led optimism that with generous inflows of aid and technical assistance the third world could be won over in the

cold war the author's direct experience as a young academic economist in cyprus malaysia uganda and liberia led him to question this general optimism the reality on the ground in the developing world did not seem to match western optimism theories and blueprints made in the west did not fit the requirements of developing countries higher production and better income distribution were inseparable twin objectives of developing nations that meant production of a higher national output must at the same time promote social justice investment must create adequate jobs so that new entrants into rapidly expanding labor force could be gainfully employed yet the dominant western theories of development at the time in particular the trickle down theory of growth prescribed growth first distribution later strategy similarly import substitution industrialization theories were emphasized at the expense of export led growth dualistic growth theories preached urban biased anti rural development this book was written as a rebuttal of such faulty theorizing and misguided professional technical assistance and the book's message is no less valid today than in the 1970s

key resolutions from the first fifty years of the united nations general assembly

this book moves away from the orthodox neoliberal paradigm to suggest a new framework linking social policy with citizenship and transformation the interjection of nation building public society and public provisioning to the study of education healthcare and employment caters to the needs of citizens equitably by combining and coagulating these three broad arenas of politico economic discussion this book takes a new approach to the analysis of social policymaking in developing countries to indicate the drivers and triggers of transformation it makes comprehensive thorough critical comparisons between the trajectories of developed and developing countries finds out the gaps in transformation and suggests drivers for changes the intentions of social policymaking as proposed in the book are to curb the growing inequalities in the forms of class power and marginalisation the chapters on education focus on provisioning of public goods for skills formation innovation and citizenship education the sections on healthcare centre on universal health care as opposed to universal health coverage by analysing access healthcare seeking behaviour price setting market provisioning etc for the chapters on employment propositions are posited regarding the expansion of productive capacity factor mobility and social security to ensure work for all besides theorising education healthcare and employment based on public provisioning by the people's state underwritten by a public society the book provides feasible solutions through data sourced from all major international organisations in addition it recognises the unique postcolonial struggles and aspirations of the developing countries and accordingly resorts to defining the normative principles reflecting nuances subtleties and peculiarities this book is a continuation of the author's fiscal and monetary policies in developing countries state citizenship and transformation routledge and will draw the attention of scholars and researchers who wish to gain a deeper understanding of and pragmatic solutions to social policies that address the transformational pathways of developing countries accentuated by the covid 19 pandemic

how can the successful development of some former third world countries be explained while other developing countries have remained stagnant or worse have deteriorated into failed states this book offers a history of the economics of development de haan examines how the right mix of policies and evolving insights in development economics have impacted certain countries with the progression from low income to middle income and even high income status in particular middle income countries encounter hindrances to transit into high income countries the challenges of low income countries and those of fragile and failed states is

elaborated as well due attention is given to successive generations of development economists economic growth models and international trade theories to provide academic background to the evolution or stagnation of developing countries the author s own experience in development aid is woven into the text making this book important and entertaining reading for researchers students of development economics international trade and international aid

this thoroughly revised and updated edition is the most comprehensive and detailed reference ever published on united nations the book demystifies the complex workings of the world s most important and influential international body

collection of essays on economic policy reform in developing countries discusses industrial policy decision making tariff reform balance of trade import substitution industrial development etc references and statistical tables

reviews causes of poverty in rural areas and presents a policy framework for reducing rural poverty including through land reform public works programs access to credit physical and social infrastructure subsidies and transfer of technology identifies key elements for drafting a policy to reduce rural poverty
