business to business b2b markets are considerably more challenging than consumer markets and demand a more specific skillset from marketers b2b buyers often dealing with highly complex products have specialist product knowledge and are

far more knowledgeable and demanding than the average consumer this textbook takes a uniquely international approach to this complex environment the result of an international team of authors and real life cases from across the globe this new edition has been fully revised with new and updated case studies from a variety of regions every chapter has been brought in line with current business to business research alongside new coverage of non profit and government marketing digital marketing ethics and corporate social responsibility other unique features include the placement of b2b in a strategic marketing context a full discussion of strategy in a global setting including hypercompetition a detailed review of global b2b services marketing trade shows and market research more selective shorter and easier to read than other b2b textbooks this is ideal for introductory b2b and intensive courses it is also comprehensive enough to cover all the aspects of b2b marketing management that any marketer needs whether they are students or practitioners seeking to improve their knowledge the textbook is also accompanied by an extensive collection of resources to aid tutors including a full set of powerpoint slides test bank of questions and practical exercises to aid student learning

bachelor thesis from the year 2014 in the subject engineering industrial engineering and management grade 1 7 wilhelm büchner hochschule private fernhochschule darmstadt fachbereich ingenieurwissenschaften informatik wirtschaftsingenieurwesen und technologiemanagement language english abstract the purpose of this thesis is to examine the application of sustainable supply chain management sscm in the growing industry of consumer electronics the research intends to look for patterns in respect to the implementation of sscm programs within selected consumer electronics focused businesses using a case study analysis the aim of this paper is to investigate which concepts of implementation and design of sscm are available in the consumer electronics industry and to analyze how they can be classified the primary sources for the main analysis of this paper are the sustainability reports from the four companies dell philips samsung and sony these companies were selected based on their location size and ranking within the industry and the method of selection is explained herein following a first look at the data a process oriented approach was chosen for the study and a careful analysis leads to the formation of a model describing the process of achieving supply chain sustainability in the consumer electronics industry the sustainability achievement process comprises eight phases 1 acknowledgement 2 vision and strategy 3 communication 4 assessment 5 goal setting 6 goal achievement 7 expanding the reach and 8 maintaining the success the model is refined and substantiated in the subsequent cross case analysis by illustrating the distinctive features of each phase within each company furthermore the author identifies indicators and keywords for every phase which permit the unambiguous association of statements to levels of sustainability achievement for easy classification critical cases are recognized examined and solved during the research in order to provide a framework for a real world application overall the derived model provides the foundation for the evaluation of a corporation s progress concerning different aspects of sustainability the thesis concludes by proposing a series of approaches for future research to increase the verification of the model and advance it potentially extending the applicability of the model to sscm in general

mechatronics in action s case study approach provides the most effective means of illustrating how mechatronics can make products and systems more flexible more responsive and possess higher levels of functionality than would otherwise be possible the series of case studies serves to illustrate how a mechatronic approach has been used to achieve enhanced performance through the transfer of functionality from the mechanical domain to electronics and software mechatronics in action not only provides readers with access to a range of case studies and the experts view of these but also offers case studies in course design and development to support tutors in making the best and most effective use of the technical coverage provided it provides in an easily accessible form a means of increasing the understanding of the mechatronic concept while giving both students and tutors substantial technical insight into how this concept has been developed and used
