originally published in 1922 an introduction to world politics was published at a particularly

interesting time in international relations just a few short years after the first world war with this in mind gibbons has approached this text as a general introduction to world politics both examining causes of recent events in his lifetime as well as exploring what he refers to as the beginning of world politics this study delves into various aspects of world politics throughout history including the colonialism of the british and the french and several wars and treaties with analysis on how this impacted on relations between nations this title will be of interest to students of political history and international relations

more than 600 entries present concise up to date information on and analysis of the major concepts ideas and institutions that are essential to the understanding of contemporary world politics

war and change in world politics introduces the reader to an important new theory of international political change arguing that the fundamental nature of international relations has not changed over the millennia professor gilpin uses history sociology and economic theory to identify the forces causing change in the world order the discussion focuses on the differential growth of power in the international system and the result of this unevenness a shift in the balance of power economic or military weakens the foundations of the existing system because those gaining power see the increasing benefits and the decreasing cost of changing the system the result maintains gilpin is that actors seek to alter the system through territorial political or economic expansion until the marginal costs of continuing change are greater than the marginal benefits when states develop the power to change the system according to their interests they will strive to do so either by increasing economic efficiency and maximizing mutual gain or by redistributing wealth and power in their own favour

this book provides a critical understanding of contemporary world politics by arguing that the neoliberal approach to international relations seduces many of us into investing our lives in projects of power and alienation these projects offer few options for emancipation consequently many feel they have little choice but to retaliate against violence with more violence the authors of this pioneering work articulate worldism as an alternative approach to world politics it intertwines non western and western traditions by drawing on marxist postcolonial feminist and critical security approaches with greek and chinese theories of politics broadly defined the authors contend that contemporary world politics cannot be understood outside the legacies of these multiple worlds including axes of power configured by gender race class and nationality

which are themselves linked to earlier histories of colonizations and their contemporary formations with fiction and poetry as exploratory methods the authors build on their multiple worlds approach to consider different sites of world politics arguing that a truly emancipatory understanding of world politics requires more than just a shift in ways of thinking above all it requires a shift in ways of being transforming world politics will be of vital interest to students and scholars of international relations political science postcolonial studies social theory women s studies asian studies european union and mediterranean studies and security studies
