offers an interdisciplinary approach to narrative perspective with essays by leading scholars of literary studies cognitive psychology linguistics philosophy and film and media criticism

alexithymia is a multifaceted construct that is characterized by several facets including difficulties identifying one's feelings difficulties describing one's feelings to others and an externally focused utilitarian cognitive style in the long term higher alexithymia scores represent risks factors for poorer mental and physical health outcomes there is however a lack of systematic understanding of the underlying processes that can explain these vulnerabilities this book shows that the facets of alexithymia influence several aspects of how one perceives and responds to neutral and emotional situations by impacting multiple cognitive processes attention appraisals memory language and behavior the effects are influenced by context with some situations leading to deficits in emotion responding and others that contribute to emotional over responding the book shows the importance of drawing better connections amongst multiple processes toward disentangling them and revealing where early processes have impacts on later processes a lack of correspondence between processes as well as amongst alexithymia facets is expected to lead to ineffective and inflexible emotion regulation thereby posing elevated risks for physical and mental illness the chapters in this book were originally published as a special issue of cognition and emotion

this bloomsbury companion provides an overview of stylistics with a detailed outline of the scope and history of the discipline as well as its key areas of research the main research

methods and approaches within the field are presented with a detailed overview and then illustrated with a chapter of unique new research by a leading scholar in the field the companion also features in depth explorations of current research areas in stylistics in the form of new studies by established researchers in the field the broad interdisciplinary scope of stylistics is reflected in the wide array of approaches taken to the linguistic study of texts drawing on traditions from linguistics literary theory literary criticism critical theory and narratology and in the diverse group of internationally recognised contributors

this book uses insights from the cognitive sciences to illuminate kafka's poetics exemplifying a paradigm for literary studies in which cognitive scientific insights are brought to bear directly on literary texts the volume shows that the concept of cognitive realism can be a critically productive framework for exploring how textual evocations of cognition correspond to or diverge from cognitive realities and how this may affect real readers in particular it argues that kafka's evocations of visual perception including narrative perspective and emotion can be understood as fundamentally enactive and that in this sense they are cognitively realistic these cognitively realistic qualities are likely to establish a compellingly direct connection with the reader's imagination but because they contradict folk psychological assumptions about how our minds work they may also leave the reader unsettled this is the first time a fully interdisciplinary research paradigm has been used to explore a single author's fictional works in depth opening up avenues for future research in cognitive literary science

this book offers a novel theory of the roles narrative plays in cognition by arguing that we can develop rich interdisciplinary research by thinking of narrative as a form of processing narrative processing describes a mode of anticipating organizing and simulating experience that is provisional ongoing and deeply integrated into how we make sense of what happens and how we figure ourselves into it accounts of narrative differ widely between cognitive psychology contemporary philosophy and literary studies as a result it is difficult to reconcile research about narrative from these disciplines yet the questions at stake in this research are often profound for example how are experiences organized into meaningful sequences how do the rich and complex features of a life narrative emerge from the ways experience is processed in perception working memory and other components of present cognition the

model of narrative processing proposed in this book complements several influential emerging theories of cognition including predictive processing emotion as a component to cognition and ecological theories of cognition the book argues that the role of narrative in higher order cognition is reciprocally related to the emergent narrative features of lower order cognition in doing so it provides a coherent concept of narrative with the potential to inform research in various disciplines

winner of the 2009 christianity today award for biblical studies stories with intent offers pastors and students a comprehensive and accessible guide to jesus parables klyne snodgrass explores in vivid detail the historical context in which these stories were told the part they played in jesus overall message and the ways in which they have been interpreted in the church and the academy snodgrass begins by surveying the primary issues in parables interpretation and providing an overview of other parables often neglected in the discussion from the old testament jewish writings and the greco roman world he then groups the more important parables of jesus thematically and offers a comprehensive treatment of each exploring both background and significance for today this tenth anniversary edition includes a substantial new chapter that surveys developments in the interpretation of parables since the book s original 2008 publication
