the book is written in an engaging and accessible style and the passion of the author is evident an interesting and timely text that will be useful to those working with very young children and their families british journal of educational studies a challenging and worthwhile read nursery world the first year of life is the year of opportunity it is when the foundations for our emotional and social well being together with our motivation and ability to learn begin to be laid down by an ongoing interplay of physical neurological and psychological processes maria robinson draws upon up to date research to illuminate this process and highlights the importance of understanding the meaning and influence of adult interactions reactions and behaviour towards their child and the child s impact on the adult she indicates how the outcomes of early experience can influence the direction of future development so providing insight into the potential reasons for children s behavioural responses the powerful nature of working with babies and young children is addressed in a separate section which encourages practitioners to reflect on how personal attitudes beliefs and values can influence professional practice this fascinating book is a valuable resource for all early years practitioners including teachers social workers and health visitors who wish to understand behaviour within a context of early developmental processes

the book culls the latest research about early development and makes it usable for parents and practitioners tackles the toughest what you were afraid to ask questions about parenting today s children as such it s more indispensable than diapers a veritable must read for anyone

who wants to enjoy parenting and do it well sharon lynn kagan ed d president national association for the education of young children  
senior associate the bush center in child development and social policy yale university from back cover

the holistic care and development of children from birth to three provides students and practitioners with the knowledge and understanding they need to meet the complex needs of babies and toddlers with a focus on the fundamentally holistic nature of young children s development and emphasising the role of play and the emotional and physical environment throughout the book shows its reader how to maximise each and every opportunity for learning when caring for the under threes the text addresses both theory and practice foregrounding the vital link between the two as the reader learns how to integrate theoretical approaches into their own setting and ways of working from personal physical social and emotional development to cooperation with parents sen and enabling environments a wealth of topics are discussed in the depth and detail required to ensure that children can be given the best possible start in their critical first three years throughout the book the following features help the reader to reflect on and develop their own practice case studies put key topics in context reflective questions help the reader test and consolidate their knowledge of key topics review your practice boxes invite the reader to reflect on their own practice further reading and research suggestions inspire independent study in key areas the book is also supported by a companion website featuring links to relevant videos and articles as well as an interactive flashcard glossary

the classic guide to child care and development offers practical supportive advice with the information organized into easy to follow age bands up to five years

children are already learning at birth and they develop and learn at a rapid pace in their early years this provides a critical foundation for lifelong progress and the adults who provide for the care and the education of young children bear a great responsibility for their health development and learning despite the fact that they share the same objective to nurture young children and secure their future success the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well transforming the workforce for children birth through age 8 explores the science of child development particularly looking at implications for the professionals who work with children this report examines the current capacities and practices of the workforce the settings in which they work the policies and infrastructure that set qualifications and provide professional learning and the government agencies and other funders who support and oversee these systems this book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals these detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning shared knowledge and competencies for care and education professionals and principles for effective professional learning young children thrive and learn best when they have secure positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress transforming the workforce for children birth through age 8 offers guidance on system changes to improve the quality of professional practice specific actions to improve professional learning systems and workforce development and research to continue to build the knowledge base in ways that will directly advance and inform future actions the recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children

improved conditions of care for premature infants have led to markedly increased survival rates over the last few decades particularly in very low and extremely low birth weight infants nutritional measures play a central role in the long term outcome health and quality of life of these premature infants in this updated and extended edition leading experts from all over the world present the most recent evidence and critical analyses of nutrient requirements and the practice of nutritional care with the focus on very low birth weight infants to provide guidance for clinical application the chapters of this publication show how growth and development can be nutritionally supported which nutrients and non nutrients can be supplied and how nutritional care can get implemented approaches to nutritional care in various disease conditions are also addressed the compilation of current information and recommendations should support the daily work of health care professionals such as neonatologists paediatricians other physicians involved in the care of preterm infants nurses nutritionists dieticians and others the current book is also of interest for researchers who wish to keep up to date in this moving field

living nature not dull art shall plan my ways and rule my heart cardinal newman nature and art 1868 one of the ineluctable consequences of growth in any field of science is that subjects of inquiry once established tend to give birth to subsubjects and that the subsubjects once established will in time undergo further mitotic division not so many years ago problems surrounding the ietus and newly born infant lay in a realm almost to be described as a no man s land obstetricians properly gave major consideration to understanding and learning about processes and disorders concerned with maternal health and safety the welfare of the infant was regarded as of secondary importance paediatricians on their part hesitated to invade the nursery a sanctum regarded as belonging to the domain of the accoucheur and the pathologist enveloped in the mysteries of life and death in the adult found scant time for the neonate and the placenta

contains information on a variety of subjects within the field of education statistics including the number of schools and colleges enrollments teachers graduates educational attainment finances federal funds for education libraries international education and research and development

this book clearly sets out each stage of child development explaining the variance in age at which different children acquire the same skills and abilities includes age appropriate checks for hearing and vision and advice on when to refer a child for specialist attention
