roy and jan have assembled a timely snapshot of our current understanding of

ecotourism both as a concept worthy of scientific inquiry and as an increasingly significant segment of global commerce and industry a terrific piece of work sam ham university of idaho us in the 30 or so year since it became established in the tourism literature and in tourism practice ecotourism has attracted as many proponents as opponents this handbook now brings together some of the leading scholars worldwide in this field to explore the current position of this form of tourism in doing so it offers serious critiques it explores meanings and paradoxes it offers best practices and it looks to the future it is the handbook for one of tourism's fastest growing and controversial sectors david airey university of surrey uk this is a most welcome and needed book with a very strong editorial team and contributing authors the handbook covers all the key issues of ecotourism it cuts through the confusion surrounding the much misunderstood concept of ecotourism clearly dealing with definitions concepts and research issues the handbook is particularly welcome for its focus on the visitor experience a strength of the editors and for clearly linking the theory of ecotourism with practice in the field christopher cooper oxford brookes university uk this handbook brings together contributions from over forty international experts in the field of ecotourism it provides a critical review and discussion of current issues and concepts it challenges readers to consider the boundaries of what ecotourism is and could be the handbook provides practical information regarding the business of ecotourism insights into ecotourist behaviour and visitor experiences and reflections on the practice of ecotourism in a range of different contexts the handbook is designed to be a valuable reference book for tourism scholars and researchers

this handbook presents a timely broad ranging and provocative overview of the essential nature of ecotourism the chapters will both advance the existing central themes of ecotourism and provide challenging and divergent observations that will thrust ecotourism into new areas of research policy and practice the volume is arranged around four key themes sustainability ethics and identity change conflict and consumption and environment and learning with a total of 28 chapters the first section focuses on sustainability as a core ecotourism criterion with a primary focus on some of the macro sustainability issues that have an impact on ecotourism foremost among these topics is the linkage to the un's sustainable development goals which have relevance to ecotourism as one of the greenest or most responsible forms of tourism the chapters in the second section provide a range of different topics that pull ecotourism research into new directions including a chapter on enriching indigenous ecotourism through culturally sensitive universalism the third section includes chapters on topics ranging from persons with disabilities as a neglected body of research in ecotourism to ecotourism as a form of luxury consumption the final section emphasises the link between ecotourism and learning about the natural world including a deeply theoretical chapter on rewilding europe with

contributions from authors around the world this handbook gives a global platform to local voices in both developed and emerging country contexts the multidisciplinary and international routledge handbook of ecotourism will be of great interest to researchers students and practitioners working in tourism and sustainability

the routledge handbook of tourism and the environment explores and critically evaluates the debates and controversies inherent to tourism s relationship with nature especially pertinent at a time of major re evaluation of our relationship with the environment as a consequence of the environmental problems we now face it brings together leading specialists from range of disciplinary backgrounds and geographical regions to provide state of the art theoretical reflection and empirical research on this complex relationship and future direction the book is divided in to five interrelated sections section one evaluates the philosophical basis rationale and complexity of what is meant by the term environment considering the major influences in the construction of how we understand our surroundings and the types of values we place upon them section two evaluates the types of eco systems that are used as natural resources for tourism and the negative and positive impacts upon them section three evaluates relevant environmental policy and management mechanisms for the impacts of tourism on the natural environment section four focuses on the changing tourism environment relationship and the types of tourism that have become established in the tourism industry market and policy section five analyzes contemporary and future issues of the tourism environment relationship based upon themes of environmental and social welfare this timely book will provide an invaluable resource for all those with an interest in tourism s relationship with the natural environment encouraging dialogue across disciplinary boundaries and areas of study the book is international in its focus emphasizing that issues of tourism and the natural environment are not only localized but transcend national boundaries that sometimes require both international and global responses this is essential reading for student researchers and academics of tourism as well as those of geography environmental studies and development studies

ecotourism is an effective way for businesses in a tourism destination to have a positive impact on their host community whether the business in question is an experience provider a lodging facility a product based company or anything in between this handbook provides the proper guidelines for sustainable and responsible business practices that promote the preservation of natural resources and wildlife and contribute to the socio cultural and economic growth of the local community this handbook is intended to be used by small and medium businesses including those under development entrepreneurs and organizations in the tourism industry as a resource and a guide to adopt specific

actions to become more sustainable and successful

intended as a guide for wildlife managers and ecotourism operators as well as interested ecotourists this book addresses the biological principles governing how ecotourism affects wildlife the introductory chapters focus on four key responses to human visitation behavioral physiological ecological and evolutionary readers will discover ecotourism's effects on biodiversity in connection with various industries that are habitat or taxonomically specific fish tourism including both freshwater and marine marine mammal tourism the huge industry centered on terrestrial animals and the well studied industry of penguin tourism given that the costs and benefits of ecotourism cannot be meaningfully assessed without understanding the human context particular attention is given to how ecotourism has been used as part of community development in closing the book synthesizes the current state of knowledge regarding best practices for reducing human impacts on wildlife the final chapter highlights key research questions that must be addressed to provide more evidence based guidelines and policy
