this volume will help the reader understand fundamental strengths and weaknesses in america s military forces thereby leading to a comprehension of what genuine military reform is and is not and what remains to be done ideas will be presented to compare genuine reform to cosmetic dabbling which fundamentally improves nothing and which sometimes arrives as ill conceived fads that promise only to burden us combat forces to the point of mental and physical immobility the work will trace the history of various attempts to impose military reform on american armed forces especially from congress starting during the american revolution and continental congress up through the present day particular focus will be placed on the effort of a small group in congress and the pentagon in the 1980s who coined the term military reform in the modern context emphasis will be on the reforms these actors advocated variously successful and unsuccessful to fundamentally alter how the department of defense designs and buys hardware and how our armed forces fight the book will use operations desert storm and iraqi freedom and the subsequent insurgency in iraq to demonstrate what has been reformed in us armed forces and the department of defense and what has not

the united states has used military force short of war as an instrument of diplomacy on many occasions and in many areas of the world in the years since the second world war this

book describes and analyzes the circumstances accompanying 215 shows of force and examines how effective these actions were in helping to attain u s foreign policy objectives which type of force air ground naval was most often used what did the forces do and how effective were they of what significance was soviet involvement when u s military power was called upon to influence events was the threat presented by the alerting or deployment of strategic nuclear forces or by very large conventional forces especially telling how clear is it that a desired effect was in fact caused by the demonstration of force barry blechman and stephen kaplan explore these and other questions examining also such elements as a president s domestic popularity and personal diplomacy preceding or during crises that led to u s military demonstrations complementing their analysis are five sets of case studies describing ten instances of the use of american military power to influence events in central and eastern europe the middle east south and southeast asia and the caribbean the case studies by david k hall william b quandt jerome n slater robert m slusser and philip windsor focus on the reasons for u s action and the methods adopted on the behavior of other parties and on the relation between the use of force and the resolution of the crisis the book s main conclusion is that the demonstrative use of u s armed forces has often stabilized a deteriorating situation enough to avoid further deterioration relieved domestic and international pressure for more drastic and possibly self defeating action and gained time for diplomacy to achieve a more lasting remedy

what role will armed forces play in a world that is turbulent yet no longer organized by the bipolar conflict of east and west in this volume leading experts from several disciplines assess the rapidly changing global strategic and cultural landscape examining how it will affect the responsibilities and social standing of the modern military there are provocative disagreements among the contributors especially over whether we should expect and prepare for another global war however the contributors generally agree on several broad themes that guide their analysis arguing that the cold war has masked basic trends that have been reshaping the international system for a long time they suggest that the sovereign states dominance of the international system is rapidly coming to an end as multinational ethnic regional and religious groups to name a few increasingly affect the course of global affairs in the absence of a clear enemy the military faces an identity crisis in the postmodern atmosphere of this multicentric global order authority is fragmented and the exercise of any one authority is subject to greater scrutiny and challenge the military has become more accepting of a variety of values life styles and attitudes toward its tasks at the same time support for the military s mission is difficult to win requiring endless justification the authors believe that the principal missions for the military in these new times are peacekeeping peacemaking and humanitarian assistance they examine the prospects for successful operations in these areas taking into account the cultural lag between world structures that favor increased multinational peacekeeping forces and

individual nations that supply token resources to support such efforts this volume provides a sophisticated and thought provoking perspective on the future role of the military in the coming decades it is sure to enrich the vigorous debate surrounding these issues

forces for good develops and explores the concept of cosmopolitan militaries it examines how governments militaries and institutions have responded politically doctrinally and operationally to claims that militaries have a new role in cosmopolitan law enforcement that allows and perhaps even requires the use of force to protect and defend those who are the victims of gross abuse of human rights the contributors include academics defence practitioners and serving military officers book jacket

the advent of the all volunteer force and the evolving nature of modern warfare have transformed our military changing it in serious if subtle ways that few americans are aware of edited by pulitzer prize winning historian david m kennedy this stimulating volume brings together insights from a remarkable group of scholars who shed important new light on the changes effecting today s armed forces beginning with a foreword by former secretary of defense william j perry the contributors take an historical approach as they explore the ever changing strategic political and fiscal contexts in which the armed forces are trained and deployed and the constantly shifting objectives that they are tasked to achieve in the post 9 11 environment they also offer strong points of view lawrence freedman for instance takes the leadership to task for uncritically embracing the high tech revolution in military affairs when conventional warfare seems increasingly unlikely and eminent psychiatrist jonathan shay warns that the post battle effects of what he terms moral wounds currently receive inadequate attention from the military and the medical

profession perhaps most troubling karl eikenberry raises the issue of the political ownership of the military in an era of all volunteer service citing the argument that absent the political protest common to the draft era government decision makers felt free to carry out military operations in both iraq and afghanistan andrew bacevich goes further writing that it's no longer our army it hasn't been for years it's theirs the government's and they intend to keep it looking at such issues as who serves and why the impact of non uniformed contractors in the war zone and the growing role of women in combat this volume brings together leading thinkers who illuminate the american military at the beginning of the twenty first century

first published in 2005 since the breaching of the berlin wall in 1989 and the subsequent end of the cold war there has been a marked increase in attention paid to multinational military forces adelphi paper 294 looks at the problems facing multinational forces and operations and the prospects for the future

until recently internal use of the armed forces has been generally regarded by the public as well as academic commentators as conduct to be expected of a military or autocratic regime not a democratic government there is however growing concern that the war on terror has been used to condition public opinion to accept the internal deployment of the armed forces including for broader industrial and political purposes this book examines the national and international law human rights and civil liberties issues involved in governments calling out troops to deal with civil unrest or terrorism as the introduction of military call out legislation has become an emerging global trend in the opening years of the 21st century there is considerable and growing interest in the constitutional and related problems surrounding the deployment of military forces for domestic purposes examining the changes underway in six comparable countries the united states canada britain germany japan and australia this book provides a review and analysis of this trend including its implications for legal and political rights

annually csis senior adviser mark cancian publishes a series of papers on u s military forces their composition new initiatives long term trends and challenges the overall theme of this year's report is the struggle to align forces and strategy because of budget tradeoffs that even defense buildups must make unrelenting operational demands that stress forces and prevent force structure reductions and legacy programs whose smooth operations and strong constituencies inhibit rapid change this report takes a deeper look at the strategic and budget context the military services special operations forces dod civilians and contractors and non dod national security organizations in the fy 2020 budget

when crisis requires u s troops to deploy on american soil the nation depends on a rich body of law to establish lines of authority guard civil liberties and protect democratic institutions

william banks and stephen dycus analyze the military's domestic role as it is shaped by law and ask what we must learn and do before the next crisis

the handbook of african defence and armed forces provides the first in depth and multifaceted analysis of the evolution and current state of national defence policies strategies doctrines capabilities security challenges and strategic responses of african states and their armed forces geographically these aspects are investigated at the national sub regional and regional levels chronologically they are analysed against the backdrop of the superpower withdrawal from the continent in the 1990s and the so called new scramble for africa which has seen a crescendo of renewed great power interest in the continent's resources as well as its strategic role location and relevance since the 2000s the book takes a bottom up and african centric approach and is organized around five key themes i the differing security outlooks and defence policies of african powers within the region and the different sub regions ii the strategies doctrines transformation and employment of african armed forces iii the relationship between african armed forces with sub regional regional and international organizations iv the challenges that african states and their armed forces have been facing and their strategic responses and v the position of african perspectives and agency in the context of continental and international security and defence understanding african security and defence especially in terms of each individual nation's ability to contribute to peacekeeping operations counterterrorism border security and internal security requires a focus on the national level of armed forces and defence policies this in turns sheds light on sub regional and regional divergences challenges and cooperation based on this framework the chapters in this volume offer comprehensive african perspectives on african and international security and defence and in doing so show the agency of the continent's countries and armed forces in international security and relations

this volume examines differing viewpoints in regards to american military forces and their use

a survey of the use of federal forces including federalized militia and national guard in domestic disturbances with special emphasis on legal and constitutional issues

this book grew out of the need to describe the culture and structure of the uniformed services to students studying defense policy in the context of a graduate program in american government at johns hopkins university the need to transform u s military forces was readily apparent in the 1989 1991 time frame as the cold war came to an abrupt end the industrial age force of the 1980s designed to fight the military forces of another great power needed to be transformed into a force designed to intervene into the affairs of lesser powers instead expensive programs were pursued to transform the industrial age force into an information age force to fight an unknown great power threat at an unknown future date

at an unknown place the many interventions of the clinton and bush administrations have exposed the failure of leadership to provide the armed forces organized trained and equipped for the real wars of a period between eras of great power conflict

in this volume john collins speaks with the authority of one who was literally present at the birth of the low intensity conflict era his long term intimate and direct contact with the esoteric world of special operations has few parallels their roots go back in time and history considerably farther but today s special operations forces are largely products of the past three decades their development has been in response to the pressures of world wide situations perceived to bear upon or which actually do affect american strategic interests the use of raw military power may not provide solutions to the complex problems involved and may even be counter productive special operations forces uniquely suited to fill the quasi military gap require the highest degree of professional competence in the application of the classical principles of war this is a big order it is difficult in a few words to pay john collins the tribute he deserves for continuing efforts to educate both the congress and the u s armed forces concerning the capabilities and limitations of special operations and the forces they involve this latest addition to his carefully researched studies combines history philosophy factual data and reference materials in a single document that should be on the desks of civilian and military leaders whose responsibilities relate in any way to special operations
