an important book on liberating ourselves from the state of waking sleep in which we live our lives as taught by one of the most influential spiritual teachers of the 20th century as the closest pupil of the charismatic spiritual master g i gurdjieff 1866 1949 jeanne de salzmann was charged with carrying on his teachings of spiritual transformation known as the fourth way or the work gurdjieff s system was based on teachings of the east that he adapted for modern life in the west now some twenty years after de salzmann s death the notebooks that she filled with her insights over a forty year period and intended to publish have been translated and edited by a small group of her family and followers the result is this long awaited guide to gurdjieff s teaching describing the routes to be traveled and the landmarks encountered along the way organized according to themes the chapters touch on all the important concepts and practices of the work including awakening from the sleep of identification with the ordinary level of being self observation and self remembering conscious effort and voluntary suffering understanding symbolic concepts like the enneagram the gurdjieff movements bodily exercises that provide training in presence and the awareness of subtle energies the necessity of a school meaning the collective practice of the teaching in a group madame de salzmann brings to the work her own strong direct language and personal journey in learning to live that knowledge of a higher level of being which she insists you have to see for yourself on a level beyond theory and concept de salzmann consistently refused to discuss the teaching in terms of ideas for this fourth way is to be experienced not simply thought or believed

four in depth lectures on the essence of the fourth way ideas their practical application for psychological and spiritual development and their relationship to christianity an extensive glossary is also included the fourth way was developed by g i gurdjieff p d ouspensky and maurice nicoll

before i begin to explain to you in a general way what this system is about and to talk about our methods i want particularly to impress on your minds that the most important ideas and principles of the system do not belong to me this is chiefly what makes them valuable because if they belonged to me they would be like all other theories invented by ordinary minds they would give only a subjective view of things when i began to write a new model of the universe in 1907 i formulated to myself as many other people have done before and since that behind the surface of the life which

we know lies something much bigger and more important and i said to myself then that until we know more about what lies behind all our knowledge of life and of ourselves is really negligible i remember one conversation at that time when i said if it were possible to accept as proven that consciousness or as i should call it now intelligence can manifest itself apart from the physical body many other things could be proved only it cannot be taken as proved i realized that manifestations of supernormal psychology such as thought transference clairvoyance the possibility of knowing the future of looking back into the past and so on have not been proved so i tried to find a method of studying these things and worked on that line for several years i found some interesting things in that way but the results were very elusive and though several experiments were successful it was almost impossible to repeat them i came to two conclusions in the course of these experiments first that we do not know enough about ordinary psychology we cannot study supernormal psychology because we do not know normal psychology secondly i came to the conclusion that certain real knowledge exists that there may be schools which know exactly what we want to know but that for some reason they are hidden and this knowledge is hidden so i began to look for these schools i travelled in europe egypt india ceylon turkey and the near east but it was really later when i had already finished these travels that i met in russia during the war a group of people who were studying a certain system which came originally from eastern schools this system began with the study of psychology exactly as i had realized it must begin the chief idea of this system was that we do not use even a small part of our powers and our forces we have in us so to speak a very big and very fine organization only we do not know how to use it in this group they employed certain oriental metaphors and they told me that we have in us a large house full of beautiful furniture with a library and many other rooms but we live in the basement and the kitchen and cannot get out of them if people tell us about what this house has upstairs we do not believe them or we laugh at them or we call it superstition or fairy tales or fables this system can be divided into study of the world on certain new principles and study of man the study of the world and study of man include in themselves a kind of special language we try to use ordinary words the same words as we use in ordinary conversation but we attach a slightly different and more precise meaning to them study of the world study of the universe is based on the study of some fundamental laws which are not generally known or recognized in science the two chief laws are the law of three and the law of seven which will be explained later included in this and necessary from this point of view is the principle of scale a principle which does not enter into ordinary scientific study or enters very little the study of man is closely connected with the idea of the evolution of man but the evolution of man must be understood in a slightly different way from the ordinary ordinarily the word evolution applied either to

man or to anything else presupposes a kind of mechanical evolution i mean that certain things by certain known or unknown laws transform into other things and these other things transform into still others and so on but from the point of view of this system there is no such evolution at all i do not speak in general but specifically of man the evolution of man if it occurs can only be the result of knowledge and effort as long as man knows only what he can know in the ordinary way there is no evolution for him and there never was any evolution for him serious study begins in this system with the study of psychology that is to say with the study of oneself because psychology cannot be studied as astronomy can outside oneself a man has to study himself when i was told that i saw at once that we do not have any methods of studying ourselves and already have many wrong ideas about ourselves so i realized that we must get rid of wrong ideas about ourselves and at the same time find methods for studying ourselves perhaps you realize how difficult it is to define what is meant by psychology there are so many meanings attached to the same words in different systems that it is difficult to have a general definition so we begin by defining psychology as study of oneself you have to learn certain methods and principles and according to these principles and using these methods you will try to see yourselves from a new point of view

get ready for unique insights into the fourth way ideas never before published this book offers a deep dive into objective cosmic laws and esoteric practices it meticulously outlines the law of three and the law of octaves here you will find a revolutionary understanding of the enneagram the version gurdjieff initially presented which starkly contrasts with commonly accepted interpretations beyond theoretical exposition the book offers abundant examples it emphasizes the practice of self remembering as a realization of oneself as a spirit and provides many practical exercises to develop the motor intellectual and emotional centers additionally the work offers an overview of meditation techniques and esoteric practices for the development of altered states of consciousness methods taught exclusively by gurdjieff in russia not in the west the book explains how negative emotions such as fear significantly hinder the development of consciousness and can lead to dangerous consequences particularly when an individual attempts to activate kundalini this textbook on the fourth way offers updated explanations applicable to modern reality and helpful to anyone on a spiritual path not just fourth way followers

ouspensky the philosopher of the fourth way in this fascinating book dive into the mind of one of the greatest thinkers of the 20th century p d ouspensky and discover how his teachings continue to illuminate the path for those seeking to understand consciousness and transcend the mechanical nature of modern life with a clear and profound approach this work reveals the journey of a man who devoted his life to the

pursuit of inner truth and the development of mindful awareness more than a biography this book is an invitation to transformation it presents the foundations of the fourth way a method of self knowledge that unites philosophy psychology and practical spirituality through concepts such as self remembering conscious work and unification of being the reader finds a precise map for the awakening of consciousness each chapter leads the reader into a new dimension of ouspensky s thought from the multiplicity of the self to the struggle against negative emotions from the illusion of free will to the search for true freedom with an engaging and accessible language the book shows that true knowledge is not acquired solely by the intellect but is earned through direct experience and inner effort ouspensky the philosopher of the fourth way is an essential read for seekers philosophers psychologists and all who feel that ordinary life conceals a deeper reality it offers a bridge between the visible and the invisible between the ordinary man and the awakened man between time and eternity allow yourself to walk alongside ouspensky on this journey of self discovery each page is a reminder that true freedom is not external it is born from inner awakening and the constant remembrance of who we truly are kadakrshna

the simplest most efficient way for anxiety and depression relief the fourth way provides a path to wisdom and spiritual enlightenment for householders ordinary people living in the world today it is also known as the way of understanding create an abundant life follow the path to a truly fulfilling existence illuminating enlightening and

uplifting this householder's way has existed since time immemorial. G. I. Gurdjieff conceived the title fourth way for the fragmentary assemblage of previously unknown teachings that he brought to the west in the early 20th century but he never claimed to have invented the way itself. Three other specialist ways have also always existed for people whose natures are predominantly intellectual, emotional or physical: the ways of knowledge, devotion and action. All these three demand some form of initial and purposeful renunciation and discipline: for instance, obedience, silence, physical regime etc. On the fourth way, the three aspects of human being—head, heart and hand—are regarded as one whole and all three are worked on simultaneously. Practice or discipline is progressively self-imposed according to individual understanding. The fourth way continually develops its form to meet the changing needs of time and culture; methods and teaching are reformulated and re-invented by each succeeding generation. The principles remain the same but the practice is always being developed and refined. One of the most ancient existing monuments related to the fourth way is the temple of Sharada in Azad Kashmir. Sharada Saraswati is the goddess of wisdom; three gates were always open but those entering any one of these had to return and enter also by the other two before full liberation could be achieved. The fourth gate called Moksha (liberation) was closed except to those who had already travelled the other three paths to be complete and effective. Any school of the fourth way requires direct connection with a truly liberated being, man or woman. Each generation has to secure its own connection by being demonstrably capable of receiving and not adulterating the influences and energy it seeks. If this connection is lost or remains unmade, the school is comparatively useless, even misleading, however much knowledge it may possess.
