in his 2006 state of the union speech president george w bush asked the u s congress to prohibit the most egregious abuses of medical research such as the creation of animal human hybrids the president s message echoed that of a 2004 report by the president s council on bioethics which recommended that hybrid human animal embryos be banned by congress discussions of early interspecies research in which cells or dna are interchanged between humans and nonhumans at early stages of development can often devolve into sweeping statements colorful imagery and confusing policy although today s policy advisory groups are becoming more informed debate is still limited by the interchangeable use of terms such as chimeras and hybrids a tendency to treat all forms of interspecies alike the failure to distinguish between laboratory research and procreation and not enough serious policy justification andrea bonnicksen seeks to understand reasons behind support of and disdain for interspecies research in such areas as chimerism hybridization interspecies nuclear transfer cross species embryo transfer and transgenics she highlights two claims critics make against early interspecies studies that the research will violate human dignity and that it can lead to procreation are these claims sufficient to justify restrictive policy bonnicksen carefully illustrates the challenges of making policy for sensitive and often sensationalized research research that touches deep seated values and that probes the boundary between human and nonhuman animals

the study of voting behaviour remains a vibrant sub discipline of political science the handbook of electoral behaviour is an authoritative and wide ranging survey of this dynamic field drawing together a team of the world s leading scholars to provide a state of the art review that sets the agenda for future study taking an interdisciplinary approach and focusing on a range of countries the handbook is composed of eight parts the first five cover the principal theoretical paradigms establishing the state of the art in their conceptualisation and application and followed by chapters on their specific challenges and innovative applications in contemporary voting studies the remaining three parts explore elements of the voting process to understand their different effects on vote outcomes the sage handbook of electoral behaviour is an essential benchmark publication for advanced students researchers and practitioners in the fields of politics sociology psychology and research methods

this book examines coercive diplomacy and presents a theory of emotional choice to analyse how affect enters into decision making

although the debate over same sex marriage in the united states has ended no one seems to know what lies on the horizon the conversation about what marriage could be like in the future is no longer confined to academics in his dissent in obergefell chief justice roberts linked the constitutionally mandated legal recognition of same sex marriage to the possibility that states may also have to recognize multi person intimate relationships as well to avoid discriminating against plural marriage enthusiasts the popularity of television shows like tlc s sister wives and hbo s big love suggests that americans no longer can be dismissive of the possibility that in the foreseeable future marriage could and perhaps should look very different than it does today rather than settling the question of whether states ought to abolish marriage make it more inclusive contractual or call it something else this book exposes readers to some of the normative legal and empirical questions that americans must address before they can deliberate thoughtfully about whether to keep the marital status quo where monogamy remains privileged unlike much of the debate over same sex marriage they exchange reasons with one another as they discuss marital reform this book is for ordinary americans their elected representatives and judges to help them ultimately decide whether they want to continue to define marriage so narrowly make it more inclusive to avoid discrimination or have the state leave the marriage business this edited interdisciplinary volume contains eight original contributions all of which illuminate important but often neglected areas of the topic

highly accessible authoritative and intellectually provocative a startlingly original theory of how homo sapiens came to be richard wrangham forcefully argues that a quarter of a million years ago rising intelligence among our ancestors led to a unique new ability with unexpected consequences our ancestors invented socially sanctioned capital punishment facilitating domestication increased cooperation the accumulation of culture and ultimately the rise of civilization itself throughout history even as quotidian life has exhibited calm and tolerance war has never been far away and even within societies violence can be a threat the goodness paradox gives a new and powerful argument for how and why this uncanny combination of peacefulness and violence crystallized after our ancestors acquired language in africa a quarter of a million years ago words allowed the sharing of intentions that enabled men effectively to coordinate their actions verbal conspiracies paved the

way for planned conflicts and most importantly for the uniquely human act of capital punishment the victims of capital punishment tended to be aggressive men and as their genes waned our ancestors became tamer this ancient form of systemic violence was critical not only encouraging cooperation in peace and war and in culture but also for making us who we are homo sapiens
