this essay presents gould s distinctive system for analyzing kin terminologies showing the system s power importance and usefulness and showing its relationship to other approaches and the payoffs each aims at in revealing significant new empirical regularities and simplifications gould s analytic system implies important constraints on future analytic and interpretative approaches to kin terminologies some of these new insights involve the demonstration of the effect of distributed collective cognitive systems over and above the effects of repeated iterations of individual cognitive constraints or pressures it is the peculiar nature of the kinterm domain that allows these findings to be so directly shown but the implication is that these findings apply more generally to the collective cognitive systems that make up language and culture

a fundamental challenge for medical informatics is to develop and apply better ways of understanding how information technologies and methods can help support the best care for every patient every day given available medical knowledge and resources in order to provide the most effective healthcare possible the activities of teams of health professionals have to be coordinated through well designed processes centered on the needs of patients for information systems to be accepted and used in such an environment they must balance

standardization based on shared medical knowledge with the flexibility required for customization to the individual patient developing innovative approaches to design and build evidence based careflow management systems is essential for providing the knowledge management infrastructure of health care organizations that seeks to increase performance in delivering high quality care services by efficiently exploiting available resources parallel challenges arise in the organization of research at the biological and clinical levels where the focus on systematically organizing and supporting processes of scientific inquiry by novel informatics methods and databases are in their very early stages these proceedings of medinfo 2004 demonstrate the base of knowledge medical informatics professionals will collectively draw upon in the years ahead to meet these challenges and realize opportunities
