Disasters both natural and man made are on the rise indeed a catastrophe of one sort or another seems always to be unfolding somewhere on the planet we have entered into a veritable age of catastrophes which have grown both larger and more complex and now routinely very widespread in scope. The old days of the geographically isolated industrial accidents of the sinking of a titanic or the explosion of a Hindenburg together with their isolated causes and limited effects are over now disasters on the scale of Hurricane Katrina, the BP oil spill or the Japan tsunami and nuclear reactor accident threaten to engulf large swaths of civilization. This book analyzes the efforts of westerners to keep the catastrophes outside while maintaining order on the inside of society. These efforts are breaking down nature and civilization have become so intertwined they can no longer be separated. Natural disasters moreover are becoming increasingly more difficult to differentiate from man made. Instructors considering this book for use in a course may request an examination copy [here](#).

Have you ever wondered what it was like to live in the past? Did they experience reality in a much different way than we do now with our media, our fast travel, our fast food and our leisure? Do you especially think about what it might have been like to have lived in Bible times? What would your childhood have been like? How would you have chosen a marriage partner? How would you probably have made a living? What sort of house would you have lived in? What diseases would have threatened your daily existence? How long would you have lived? How would you have practiced your religion? These are a few of the intriguing questions answered by this study. The book takes you on a journey into the past to view daily life through the lenses of not only texts but archaeological finds. The information from the past is also filtered through ethnographic studies of more contemporaneous yet traditional societies in the Middle East. The result is a presentation that may surprise you, even shock you at times but always will interest you.
