social policy in a global society parallels and lessons from the canada latin america experience

taking issue with those who see recent social transformations as an extension of modernity the author contends that social theory must confront an epochal change from the modern era to a new era of globality in which human beings can conceive of forces at work on a global scale and in which they espouse values that take the globe as their reference point the book begins by assessing the problems of writing about modernity showing how

narratives of an endlessly self-perpetuating modern age were intrinsic to the modern project. The attempt by enlightenment philosophers to transform the everyday world in accord with science and logic under the auspices of the nation state now we are beginning to realize that the nation state and the modern project cannot renew themselves endlessly through expansion. Instead, the author contends, the age has culminated in its own dissolution and globality has supplanted modernity as the basis for action and social organization. In theorizing the global age, he considers the worldwide environmental consequences of aggregate human activities, the reconception of human security in the age of nuclear weapons, technological advances in communication systems, the rise of a global economy, and the growing reflexivity of global consciousness as people and groups begin to refer to the globe as the frame for their beliefs. The book concludes by examining the consequences of the global age thesis for politics, identifying a new popular construction of the state that the author terms performative citizenship. In the modern age, the nation state was the central power, and citizens were beneficiaries of that power with rights and duties. In the global age, citizens respond to the lack of central power by creating or performing the state themselves. The global managerial class uses the skills learned in the bureaucracy of the nation state to bring pressure on national governments in the interests of global economic, environmental, or human rights issues.

School reform in a global society is about how a silent wealthy upper class in the United States waited until the end of the twentieth century to transform America into something it once was during the age of the robber barons. Known today as neoliberals, this nostalgic elite craving the return of the unregulated capitalism of the nineteenth century see themselves as the new Victorian imperialists. Using the term globalization to mean economic colonialism, their corporate policies force third-world governments, parents, and children alike to accept schooling that disregards and damages their cultures. Even in the United States, they discovered they could not create their nineteenth-century imperial nirvana without first forcing schools to develop an obedient working class that swore allegiance to them. This social history of schools, capitalism, colonialism, and its child named globalization is about how those who crave wealth and power are willing to gamble away the lives of American youth to satisfy their dreams of past economic glory.

The world system theory (WST) provides an excellent platform to discuss the dissemination of wealth between nations and the hierarchical value of being a leading nation in the progression of globalization. The primary focus of this paper is to unpack the tenets of globalization and to investigate how each area proposed serves as a system of interrelated parts that function as a whole. When we think about the collapse of the American economy back in 2008, we must also consider the domino effect that crippled core nations such as the EU countries and Japan. We are speaking about a world economy, not just a single framework.

therefore it is important that we view globalization as a system of interlocking components recognizing that a change in one part results in changes elsewhere in the system the outcome is that globalization has opened america s borders to skilled foreign workers graduates must prepare themselves well to compete in this new global marketplace more research is needed using the wst a better understand on how nations are dealing with eroding super powers and embracing a new paradigm of hegemony with repeating patterns of interdependence between nations abstract from author supplied metadata

barry buzan proposes a new approach to making international relations a truly global discipline that transcends both eurocentrism and comparative civilisations he narrates the story of humankind as a whole across three eras using its material conditions and social structures to show how global society has evolved deploying the english school s idea of primary institutions and setting their story across three domains interpolity transnational and interhuman this book conveys a living historical sense of the human story whilst avoiding the overabstraction of many social science grand theories buzan sharpens the familiar story of three main eras in human history with the novel idea that these eras are separated by turbulent periods of transition this device enables a radical retelling of how modernity emerged from the late 18th century he shows how the concept of global society can build bridges connecting international relations global historical sociology and global world history

explains how environmentalism became a fundamental norm in international relations and explores the impact of the greening of international society

first published in 1997 living in the global society reflects on the fundamental concept of global economy as the driving force for development and examines how ethical values can direct this towards the welfare of humankind in a future where peace will reign the contributions stem from an international conference held in rome on economic growth for what kind of future the book examines four main themes development and underdevelopment globalization in the fields of economics finance trade migration and culture the shape of the world to come through management of resources and goods and finally the challenge of globalization moving from fragmentation towards social growth based on cooperation and integration it is suggested that only a civil society that is also developed at an international level can provide the basis for a true global democracy and true peace this book asks how far are we along the path towards its creation

explores what the structure of a united world will be in the twenty first century a thought provoking collection of essays drawn from the unesco s conference proceedings

globalization is widely accepted as being a defining process of our modern society but to what extent do individuals think feel or act in a way that takes account of the whole world do globalization processes really affect us in our everyday lives and if so where are the boundaries between local and global society this book investigates how local and global studies overlap and interact by examining how real local lives function under global conditions it begins by unravelling the most important concepts and debates in the field opening them up to scrutiny and testing their assumptions through recent case studies and empirical material the book goes on to examine the power of local forces in forming global processes and explores our attachment to local vs global identities whilst asking if we can build on our local attachments to move towards a world society from concerns about the international economy and growing global inequalities to worldwide fears of organized crime and terrorism this insightful book suggests a new way of looking at the interaction of local and global transformations local lives and global transformations gives student readers the knowledge and the encouragement to push the boundaries of their understanding of globalization it is inspiring reading for all those studying and interested in globalization throughout the social sciences
