this casebook profiles exceptional traumatic injury prevention programs from all over the
globe its detailed description and analysis employ a multi stage process of identifying
evaluating and casing effective prevention practices the case studies reflect how
legislative and regulatory information impact prevention efforts and provide insight into
how national centers for injury prevention and control inform prevention practices on
countrywide levels the authors work with outcome based research criteria to select and
develop their comprehensive and contextually aware profiles of the programs all included
case studies follow the brio approach background resources implementation and
outcome a model designed to provide a consistent way of describing programs that have
been evaluated and found to be exceptional practices the scope of the casebook ranges

across the challenge of traumatic injury prevention sports and recreation related traumatic injury prevention fall related traumatic injury prevention road traffic related traumatic injury prevention traumatic injury prevention within complex systems in its recognition of traumatic injury prevention across the lifespan as a critical and complex public health challenge the casebook of traumatic injury prevention promises to be an influential and authoritative resource for professionals and students in public health safety injury prevention medicine psychology sociology nursing and engineering government agencies and institutions such as the centers for disease control and prevention cdc public health departments and safety associations also would find the casebook relevant to their work

the goal of the exploring series has been to move readers beyond the point and click helping them understand the why and how behind each skill coverage of microsoft word microsoft excel microsoft access microsoft powerpoint windows vista and capstone exercises market for business professionals seeking to enhance their knowledge of microsoft office

lists and describes schools in the united states and canada

this volume comprises contributions from several fields of study in the social sciences the different disciplinary angles intersect at the level of the research subjects families households and consumers together they reflect a broad field of study that always had its particular niche in wageningen as household and consumer studies the five separate parts the formation and dissolution of families stratification and inequality consumer and household behaviour leisure time and hygiene health and society nicely reflect the broadness of this field the eighteen contributions in this volume were purposefully selected not only based on their contents and quality but also because of their relationship to the work of kees de hoog who retired this year although kees de hoog is a professor of family sociology and family policy his work throughout the years has extended far beyond that and covers the fields that are captured by the different parts in this book therefore the contributions in this volume comprise an interesting read for scholars all over the world who have an interest in families consumers households and the ways they interface

written by two internationally recognised experts equitation science is the first book to draw together the principles of this emerging field into a much needed coherent source

of information the goal of equitation science is to enhance our understanding of how horses think and learn and to use their natural behaviour to train ride or compete with them in as fair a manner as possible the welfare consequences of training and competing horses under different protocols are explored drawing on traditional and emergent techniques this book incorporates learning theory into an ethical equine training system suitable for all levels it also focuses on evidence based approaches that improve rider safety equitation science is one of those rare books that is going to change the way we train and manage horses forever it brings together a fundamental understanding of the way horses think and behave and presents a system of modern training that has the welfare of the horse at its core it must be the foundation work for the next generation of professional and amateur riders and trainers riders will ride better trainers will train better and we will have happier healthier horses wayne channon international grand prix rider i found this a very interesting and enlightening book equitation science will help anyone involved with horses to understand them more and to be more effective in their training and education the knowledge this brings to anyone involved with horses should help to make the horses lives easier and therefore allow the partnership between humans and equines to flourish yogi breisner british eventing performance manager equitation science is an ambitious and thorough look at an enormous range of areas approaches and factors concerning the training of horses the authors have an underlying theme to their text of scientifically assessing and then also promoting the use of ethical and humane methods of horse training to increase all sport horses welfare and happiness within their sporting requirements equitation science also provides an invaluable insight as to how and why what we do with our horses actually works paul tapner professional international advanced eventing rider badminton cci 2010 winner

the science of equestrian sports is a comprehensive study of the theory and practice of the rider in equine sport while most scholarship to date has focused on the horse in competition this is the first book to collate current data relating specifically to riders it provides valuable insight into improving sporting performance and maintaining the safety of both the horse and the rider drawing on the latest scientific research and covering a wide range of equestrian disciplines from horseracing to eventing the book systematically explores core subjects such as physiology of the rider sport psychology in equestrian sport preventing injury biomechanics and kinematics coaching equestrian sport the nature of horse rider relationships this holistic and scientific examination of the role of

the horse rider is essential reading for sport science students with an interest in equestrian sport and equitation furthermore it will be an invaluable resource for instructors coaches sport psychologists or physiologists working with equestrian athletes

whether it is the bravado of show jumping the elegance of dressage or the thrill of three day eventing the olympic equestrian disciplines have a storied history that celebrates the unique partnership between horse and rider this revised edition highlights and chronicles the worlds most celebrated equestrian athletes both human and equine in the only olympic sport where men and women compete on a level playing field

this book presents an in depth qualitative exploration of the practice of horse riding by disabled and non disabled riders and their horses situated as part of an affective turn within human geography creative and original use is made of poststructuralist theory to bring together animal studies and disability studies in order to decentre the human as we think about the social eighteen months of multi sited performance ethnography on the hoof were conducted with riders recruited from local riding schools an internet forum and three riding for the disabled association rda groups the study employed various methods including diary keeping participant observation and video recording of riding activities in order to capture moments of horse human relating through these methods the embodied expressions of horses are taken seriously as demonstrative of their individual thoughts and intentions

the first edition of equine locomotion has established itself as the book in the equine literature that discusses all aspects of equine locomotion and gait analysis written by an international team of editors and contributors the new edition continues this trend and gives the reader a complete picture of the horse in motion at the same time including many recent findings in this area the book begins with a history of man s association with the horse and then continues to discuss with comprehensive descriptions of the present state of knowledge beginning with the initiation of gait and ending with the more scientific area of computer modeling in the new edition the list of contributors continues to comprise of authors who are acknowledged experts in their subject areas and includes many new illustrations international team of editors and contributors with leading experts from the usa the netherlands sweden and france all centres of excellence for the study of equine locomotion editors are from two of the worlds leading locomotion centres utrecht and michigan highly illustrated with nearly 500 detailed line drawings and illustrations covers all you will ever need to know about equine locomotion gait analysis
