some twenty years ago it was widely believed that nothing much happened to the English language since the beginning of the eighteenth century. Recent research has shown that this is far from true and this book offers an introduction to a period that forms the tail end of the standardisation process: codification and prescription during which important social changes such as the industrial revolution are reflected in the language. Late modern English is currently receiving a lot of scholarly attention mainly as a result of new developments in sociohistorical linguistics and corpus linguistics. By drawing on such research the present book offers a much fuller account of the language of the period than was previously possible. It is designed for students and beginning scholars interested in late modern English. The volume includes a basis in recent research by which sociolinguistic models are applied to earlier stages of the language. 1700–1900: a focus on people as speakers wherever possible and writers of English. Research questions aimed at acquiring skills at working with important electronic research tools such as eighteenth-century collections online, *ECCO*, the Oxford English Dictionary and the Oxford Dictionary of National Biography, reference to electronically available texts and databases such as Martha Ballard's diary, the Proceedings of the Old Bailey and Mrs Beeton's book of household management.

offers guidance on English grammar and discusses the meanings, proper use and pronunciation of a wide range of words.

Excerpt from a modern English grammar: This book is an attempt to present the grammar of modern English in the manner prescribed by modern methods of instruction. The general treatment of the subject has been determined by two considerations. The first is that when pupils begin the study of grammar they not only are able to understand the language of standard English literature but they are continually using sentences of their own with considerable fluency and accuracy. The second is that though pupils have considerable skill in the use of language they have little knowledge of the nature of sentences and little insight into the fundamental relations of subject, predicate, complement and modifier. Excerpt from a modern English grammar: The editor has been careful to disturb in no way the admirable arrangement of Mr Buehler's *Modern English Grammar* to bring it into harmony with our matriculation requirements. He has in a few places given additional information, as in the treatment of the compound noun and of infinitives and participles, and has made minor alterations where it seemed advisable. In writing the historical appendix he has been careful not to enter into too great detail but has rather sought in a suggestive way to interest the student in the great laws which determine the growth and decay of language. Yet the editor can affirm from his experience as an examiner for the province that while the historical account is free from burdensome detail it contains all that is essential for matriculation and for the advanced examinations in the department.
