the abrégé provides an introduction to the evolution of french from latin to the end of the old french period presented by syllabic position rather than by individual vowels and consonants it builds on the achievements of the field s century old tradition from bourciez to straka but also engages the developments of modern phonology notably on syllabic structure and autosegmental representations

corpus dialectology combines the fields of corpus linguistics and dialectological mapping it concerns documentation of linguistic variation and mapping of linguistic spaces and boundaries while ascribing renewed importance to the methodology and the material itself especially data processing and statistical analysis this approach considers phenomena that have received little attention to date such as migration language contact mobility and educational level as well as the differentiation between rural and urban spaces

transparently described and intersubjectively comprehensible encodings permit the enhancement of dialectometry in the context of digital humanities and further development of linguistic theories of variation and change as well as different levels of structure phonology morphosyntax semantics this book contains nine chapters on ongoing corpus dialectological research projects they discuss current issues of data collection for example the validity of crowdsourced data explore challenges and possibilities of data analysis and offer theoretical reflections on virtual romance geolinguistics
