st francis and cultural memory explores central aspects of english national spiritual and broader cultural identity through a detailed yet accessible analysis of a familiar figure the franciscan friar covering more than four hundred years from the late fourteenth to the late eighteenth centuries and taking in a wide variety of different literary and artistic forms the book charts the changing face of the franciscan friar in the english literary imagination and examines how developments within this evolving tradition were both

shaped by and have helped to shape wider debates within english culture about the relationship between religious and national identity and the past and the present central to this analysis is the notion of cultural memory at the time of its suppression in the 1530s the franciscan order was too deeply assimilated into the social fabric of england either to be forgotten or to be credibly labelled an entirely alien presence despite the best efforts of protestant polemicists to do so rather the effect of the reformation was to suppress but not completely to erase memories of english franciscans the catholic history that english protestantism sought to deny was prone to return in unexpected and often distorted and disturbing forms so that in the centuries following the reformation franciscans came to haunt the imagination of english writers and artists appearing in a wide variety of literary and artistic guises these ghostly franciscans functioned as spectres of a national past which english protestantism tried to disavow but which it was unable entirely to destroy franciscan friars appear in the work of some of the most popular and influential writers and artists from the fourteenth to the eighteenth centuries reflecting the centrality of the order to ongoing debates within english culture about religion and national identity the book discusses in detail the work of geoffrey chaucer thomas malory thomas more william shakespeare william hogarth edward gibbon ann radcliffe and matthew lewis it explores the individual responses of these writers and artists to the franciscans and their legacy and also highlights the ways in which this shared interest in the order reveals hitherto unacknowledged connections between their work

this volume explores the relationship of mendicant men and women to cities and their inhabitants in the mediterranean world c 1200 1500 it asks questions including what was specifically urban about the mendicant movement what does it mean to think of the mendicants as an urban phenomenon and was there anything common to mendicant experiences in the cities of the mediterranean in addressing these questions the volume expands our understanding of the mendicants by offering chapters that examine this religious movement within urban environments from the iberian peninsula north africa southern france and italy to the dalmatian coast aegean islands egypt and the levant the chapters treat a wide array of textual artistic and architectural sources to consider how mendicants navigated and negotiated the unique social dynamics of mediterranean cities in their interactions with political potentates merchants prisoners pilgrims religious and intellectual elites non christians and inhabitants of the surrounding countryside it thus offers an interdisciplinary and broad survey of mendicancy as a social religious phenomenon of the urban mediterranean demonstrating that these communities can be defined by much more than their traditionally accepted roles as beggars preachers and teachers mendicants and the urban mediterranean c 1200 1500 will be of interest to scholars and students

across multiple disciplines engaged in questions about medieval mendicancy gender urban society inter religious encounters and the mediterranean
