this reader brings together material from ecological thought environmental policy environmental philosophy social and political thought historical sociology and cultural studies the extracts tell the story of the way the natural environment has been understood in the modern world and how this has recently been questioned as contemporary societies are seen as characterised by uncertainty and complexity the literature guides the reader through the conventiaonal grounds for thinking about rights and obligations in relation to future generations non human animals and the biotic communities bringing each into question this then leads into a critical examination of social and political theories and their capacity for drawing on ecological thought each of the seven sections of readings is introduced by the editor who locates the set of readings within the specific themes and issues at the heart of each section this broad reaching and thought provoking set of readings stresses the diversity of response to environmental problems both within and between anthropocentric and ecocentric approaches and will encourage the reader to examine how they are manifested in the areas of environmental ethics policy analysis and social and political theory

first place winner of the society of environmental journalists rachel carson environment book award if you re looking for something to cling to in what often feels like a hopeless conversation schlossberg s darkly humorous knowledge is power eyes wide open approach may be just the thing vogue from a former new york times science writer this urgent call to action will empower you to

stand up to climate change and environmental pollution by making simple but impactful everyday choices with urgency and wit tatiana schlossberg explains that far from being only a distant problem of the natural world created by the fossil fuel industry climate change is all around us all the time lurking everywhere in our convenience driven society all without our realizing it by examining the unseen and unconscious environmental impacts in four areas the internet and technology food fashion and fuel schlossberg helps readers better understand why climate change is such a complicated issue and how it connects all of us how streaming a movie on netflix in new york burns coal in virginia how eating a hamburger in california might contribute to pollution in the gulf of mexico how buying an inexpensive cashmere sweater in chicago expands the mongolian desert how destroying forests from north carolina is necessary to generate electricity in england cataloging the complexities and frustrations of our carbon intensive society with a dry sense of humor schlossberg makes the climate crisis and its solutions interesting and relevant to everyone who cares even a little about the planet she empowers readers to think about their stuff and the environment in a new way helping them make more informed choices when it comes to the future of our world most importantly this is a book about the power we have as voters and consumers to make sure that the fight against climate change includes all of us and all of our stuff not just industry groups and politicians if we have any hope of solving the problem we all have to do it together a compelling and illuminating look at how our daily habits impact the environment vanity fair shows how even the smallest decisions can have profound environmental consequences the new york times

drawing a completely new road map toward a sustainable future jack m hollander contends that our most critical environmental problem is global poverty his balanced authoritative and lucid book challenges widely held beliefs that economic development and affluence pose a major threat to the world s environment and resources pointing to the great strides that have been made toward improving and protecting the environment in the affluent democracies hollander makes the case that the essential prerequisite for sustainability is a global transition from poverty to affluence coupled with a transition to freedom and democracy the real environmental crisis takes a close look at the major environment and resource issues population growth climate change agriculture and food supply our fisheries forests and fossil fuels water and air quality and solar and nuclear power in each case hollander finds compelling evidence that economic development and technological advances can relieve such problems as food shortages deforestation air pollution and land

degradation and provide clean water adequate energy supplies and improved public health the book also tackles issues such as global warming genetically modified foods automobile and transportation technologies and the highly significant endangered species act which hollanders asserts never would have been legislated in a poor country whose citizens struggle just to survive hollanders asks us to look beyond the media's doomsday rhetoric about the state of the environment for much of it is simply not true and to commit much more of our resources where they will do the most good to lifting the world's population out of poverty

plastics offer a variety of environmental benefits however their production applications and disposal present many environmental concerns plastics and the environment provides state of the art technical and research information on the complex relationship between the plastic and polymer industry and the environment focusing on the sustainability environmental impact and cost benefit tradeoffs associated with different technologies bringing together the field's leading researchers anthony andrady's innovative collection not only covers how plastics affect the environment but also how environmental factors affect plastics the relative benefits of recycling resource recovery and energy recovery are also discussed in detail the first of the book's four sections represents a basic introduction to the key subject matter of plastics and the environment the second explores several pertinent applications of plastics with environmental implications packaging paints and coatings textiles and agricultural film use the third section discusses the behavior of plastics in some of the environments in which they are typically used such as the outdoors in biotic environments or in fires the final section consists of chapters on recycling and thermal treatment of plastics waste chapters include commodity polymers plastics in transportation biodegradation of common polymers thermal treatment of polymer waste incineration of plastics the contributors also focus on the effectiveness of recent technologies in mitigating environmental impacts particularly those for managing plastics in the solid waste stream plastic and design engineers polymer chemists material scientists and ecologists will find plastics and the environment to be a vital resource to this critical industry

introduction to environmental studies interdisciplinary readings provides students with a carefully selected collection of articles that help them navigate the most important topics in environmental studies focusing on different connections between humans and the environment the anthology emphasizes voices outside the white male canon to provide students with diverse perspectives and a broader understanding of contemporary issues within the discipline opening chapters introduce

environmental studies sustainability and the connection between humans and the resources we extract from the environment subsequent chapters examine the history of environmentalism in north america how our relationship to the environment has evolved over time a concise survey of key environmental processes and issues related to climate change and our climate crisis students read about the environmental impact of our food production processes on different countries and groups of people issues related to environmental justice the ways in which human population affects the environmental sustainability of our future and sustainable energy issues the anthology s final chapters address environmental legislation and policies ethical issues around consumption and collective responsibility and the future of our environment featuring compelling and timely readings introduction to environmental studies is an ideal resource for courses within the discipline

the second edition of this fully integrated introductory text for courses in environmental studies and physical geography builds on the resounding success of the first edition providing a comprehensive account of modern environmental issues and the physical and socio economic framework in which they are set it explains the principles and applications of the different parts of the earth s system the lithosphere atmosphere hydrosphere and the biosphere and explains the interrelationships within and between these systems it explores the present environmental crisis examines how the planet earth fits into the wider universe and explores human environment interactions

nils petter gleditsch international peace research institute oslo prio department of sociology and political science norwegian university of science and technology trondheim this book could hardly have happened but for the end of the cold war the decline of the east west conflict has opened up the arena for increased attention to other lines of conflict in europe and at the global level environmental disruption not a new phenomenon by any means is a chief beneficiary of the shift in priorities in the public debate the scientific and environmental affairs division of nato has moved with the times and has defined environmental security as one of its priority areas for cooperation with central and eastern europe and countries of the former soviet union this book is the main output of an advanced research workshop arw held in bolkesjøl norway 12 16 june 1996 i would like to acknowledge the personal support of l veiga da cunha director of the priority area on environmental security research on these issues is now very much a collaborative effort across former lines of division in europe nato encourages indeed requires that this be reflected in the composition of the participants as well as the organizing committee this meeting was organized by a group of five people from five different countries lothar brock germany nils petter gleditsch
