a fascinating and inspirational look at the vital link between the hidden geometrical order of the universe geometry in nature and the geometry of the man made world the da vinci code has awakened the public to the powerful and very ancient idea that religious truths and mathematical principles are intimately intertwined sacred geometry offers an accessible way of understanding how that connection is revealed in nature and the arts over the centuries temple builders have relied on magic numbers to shape sacred spaces astronomers have used geometry to calculate holy seasons and philosophers have observed the harmony of the universe in the numerical properties of music by showing how the discoveries of mathematics are manifested over and over again in biology and physics

and how they have inspired the greatest works of art this illuminating study reveals the universal principles that link us to the infinite

originally published in 1993 translation as social action is a varied collection of essays which addresses translation as social action as its central theme the book proposes a model of the translator as an agent in his or her own right translation is seen not just as a transfer of meanings from one language to another but rather as an arena in which different cultures meet in the person of the translator this perspective provides a complete contrast to western translation studies concerned with whether or not translation is really possible together the essays reveal a distinct tradition grappling with the most important topics in translation studies in ways that are different and challenging the collection is essential reading for translation studies as well as providing an interesting perspective on comparative literature and eastern european studies
