gerald keller s new applied statistics with microsoft® excel integrates excel into the general introductory statistics
course keller the co author of the market leading statistics for management and economics fifth edition incorporates
his proven three step problem solving process throughout this book the first step identify is the work a statistician
does before the calculations are performed which entails organizing the experiment gathering the data and deciding
which statistical techniques to employ the second step compute is the computation with excel in this step keller
shows the manual calculation for the simplest of techniques only for example he describes how to calculate the
sample mean variance and standard deviation how to compute the z interval estimate of and the z test of the third
step interpret is the interpretation of the computer output which requires an understanding of statistical concepts

this is a supplemental text intended to accompany an introductory statistics textbook each chapter is organized
around a particular statistical concept or technique some of the chapters contain experiments designed to permit

students to explore statistical concepts by using the computer to perform experiments the use of excel to conduct established analytical procedures is fully covered
