energy efficiency in the urban environment is a study of energy crisis urbanisation and climate change as well as a discussion of how to combat these global challenges with a special focus on egypt this book addresses the macroscale of urbanism from the perspective of city dwellers quality of life and explores the microscale of buildings and

this book stems from the seminal work of robert venturi and aims at re projecting it in the current cultural debate by extending it to the scale of landscape and placing it in connection with representative issues it brings out the transdisciplinary synthesis of a

necessarily interdisciplinary approach to the theme aimed at creating new models which are able to represent the complexity of a contradictory reality and to redefine the centrality of human dimension as such the volume gathers multiple experiences developed in different geographical areas which come into connection with the role of representation composed of 43 chapters written by 81 authors from around the world with an introduction by jim venturi and cezar niculescu the volume is divided into two parts the first one more theoretical and the other one which showcases real world applications although there is never a total split between criticism and operational experimentation of research

this book examines the concept of sustainability and presents a critical exploration of its influence on society williams argues for an end to the mantra of sustainability removing its status as orthodoxy and for the reinstatement of the notions of development progress and ambition in its place

this is the first in a series of books drawing on the expertise of the academy of urbanism this book examines the concepts that are core to the academy the way that urban space is designed the quality place created by the buildings that enclose this space and the life that animates it capitals towns neighbourhoods streets and urban places are explored by chris balch david rudlin brian evans david taylor and sarah chaplin respectively the book is a fascinating take on urban places and the force that animates them written by some of the most experienced urban practitioners in the uk and illustrated beautifully with drawings by david harry harrison and poems by ian macmillan

eighteen papers arising from a symposium entitled the origins of urbanization in iberia which was held at the british academy in 1994 the geographical importance of iberia and its archaeological significance is becoming ever more recognised and co operation between european archaeologists has resulted in several joint projects some of which are described in these papers contributors include archaeologists from spain portugal and britain papers are in english but all abstracts are also in spanish papers cover the period from the copper age to the second century ad
