a book on legal philosophy necessarily focuses attention on law in addition to this focus an introduction to an african legal philosophy focuses attention on philosophy the link between law and philosophy is brought into relief which is done through an african context an attempt is made to spell out what is african about legal philosophy without being cut off of african legal philosophy from non african legal philosophy the book draws attention to the view that a basic component of african legal philosophy consists of an investigation of what it is to be an african and because an african is a human being among other human beings the investigation is about what it is to be a human being ubuntuism is an african derived word that captures this mode of being human moreover because human beings are cultural beings african cultural context guides the

investigation inescapably it is claimed that every legal philosophy is embedded in a culture african legal philosophy is not an exception it is deeply rooted in african culture a culture that is today shaped in part by a european colonialist culture one feature that will strike one as one reads the book is that the book approaches african legal philosophy as a means of decolonization of african culture african legal philosophy can accomplish this intelligently and effectively if it is itself decolonized in doing this it contrasts sharply with mainstream western legal philosophy

this textbook helped to define the field of behavioural ecology in this fourth edition the text has been completely revised with new chapters and many new illustrations and full colour photographs the theme once again is the influence of natural selection on behaviour an animal's struggle to survive and reproduce by exploiting and competing for resources avoiding predators selecting mates and caring for offspring and how animal societies reflect both cooperation and conflict among individuals stuart a west has joined as a co author bringing his own perspectives and work on microbial systems into the book written in the same engaging and lucid style as the previous editions the authors explain the latest theoretical ideas using examples from micro organisms invertebrates and vertebrates there are boxed sections for some topics and marginal notes help guide the reader the book is essential reading for students of behavioural ecology animal behaviour and evolutionary biology key features long awaited new edition of a field defining textbook new chapters illustrations and colour photographs new co author focuses on the influence of natural selection on behavior and how animal societies reflect both cooperation and conflict among individuals the long awaited update to a classic in this field is now here presenting new directions in thinking and addressing burning questions richly informed by progress in many other disciplines such as sensory physiology genetics and evolutionary theory it marks the emergence of behavioural ecology as a fully fledged discipline this is a marvellous book written in a lucid style a must read for those in the field it is also a cornucopia of new thinking for anyone interested in evolution and behaviour manfred milinski nature 2012
