semantics of chinese questions is the first major study of chinese questions especially wh questions within the framework of alternative semantics it takes an interface approach to study the syntax semantics and phonology of questions and proposes a phonological scope marking strategy in chinese questions based upon experimental data it also incorporates historical linguistic data regarding the grammaticalization of sentence final particles such as ne and ma to study the formal diachronic semantics of questions primarily suitable for scholars in the field of chinese linguistics this book makes new theoretical contributions to the study of questions

the semantics of chinese classifiers and linguistic relativity focuses on the semantic structure of chinese classifiers under the cognitive linguistics framework and the implications thereof on linguistic relativity and language acquisition it examines the semantic correlation between a given classifier and its associated nouns nouns in chinese which are assigned specific classifiers according to their selected characteristics reflect the process of human categorization the concrete categories formed by the relationship between nouns and classifiers may serve to explain the conceptual structure of the chinese language and certain underlying aspects of culture and human cognition song jiang is assistant professor of chinese for the department of east asian languages and literatures at university of hawaii i at mānoa

4 1 predicative construction 4 2 emphatic construction 5 summary 7 the cleft construction 1 introduction 2 previous analyses 3 a dynamic analysis 4 summary 8 semantic underspecification cases of personal pronouns 1 introduction 2 previous analysis of expletive ta 3 a dynamic analysis 3 1 a dynamic analysis of the typical and non typical referential construal of ta 3 2 a dynamic analysis of the expletive construal of ta 3 3 scope interpretation and expletive ta 3 4 some implications 4 summary 9 conclusion 1 contributions to chinese linguistics 2 reflections on linguistic theorizing bibliography index

what is cultural semantics how to define and analyze it in the lexicon of modern chinese this book outlines the development and research results of cultural semantic theory and then proposes the distinction between two types of cultural semantics at the synchronic level conceptual gap items and items with a cultural meaning it provides criteria for identifying these items by using detailed examples from theory and application finally the two types of cultural semantics are applied to the case of modern chinese the criteria proposed for determining the chinese cultural semantics apply not only to this but also to other languages therefore this book offers an operational basis for further studies of cultural semantics in academia

as a distinctive syntactic structure in mandarin chinese the patient subject construction psc is one of the most interesting but least well understood structures in the language this book offers a comprehensive account of the history structure meaning and use of the psc unlike previous descriptions which were framed in terms of pre existing grammatical notions such as topicalization passivization and ergativization this book offers a fresh look at the psc in which its syntactic and semantic as well as its discourse functions are examined within the system of major construction types of the language as a whole the psc being low in transitivity serves primarily the function of backgrounding in discourse typologically the psc bears a resemblance to middle constructions in indo european and other languages raising interesting questions about ways to understand congruent and divergent syntactic structures across the world s languages this book will be of interest to students of chinese linguistics as well as language typology

music is a widely enjoyed human experience it is therefore natural that we have wanted to describe document analyse and somehow grasp it in language this book surveys a representative selection of musical concepts in chinese language i e words that describe or refer to aspects of chinese

music important as these musical concepts are in the language they have been in wide circulation since ancient times without being subjected to any serious semantic analysis the current study is the first known attempt at analysing these chinese musical concepts linguistically adopting the natural semantic metalanguage nsm approach to formulate semantically and cognitively rigorous explications readers will be able to better understand not only these musical concepts but also significant aspects of the chinese culture which many of these musical concepts represent this volume contributes to the fields of cognitive linguistics semantics music musicology and chinese studies offering readers a fresh account of chinese ways of thinking not least chinese ways of viewing or appreciating music ultimately this study represents trailblazing research on the relationship between language culture and cognition
