exploring the most important ideas in social psychology this collection of classic and contemporary readings includes accounts of specific experimental findings as well as more general articles summarising studies on such topics as attraction and aggression in the new edition the most significant and proactive articles of earlier editions have been retained including such classics as stanley milgram on obedience and solomon asch on conformity organised to illustrate the major themes of elliot aronson s highly praised book the social animal this acclaimed collection of articles can readily be adapted for use with any introductory social psychology text or even in lieu of a text

this book offers a philosophical analysis of what it is to be a human being in all her aspects it analyses what is meant by the self and the i and how this feeling of a self or an i is connected to the brain it studies specific cases of brain disorders based on the idea that in order to understand the common one has to study the specific the book shows how the self is thought of as a three fold emergent self comprising a relationship between an objective neural segment a subjective neural segment and a subjective transcendent segment it explains that the self in the world tackles philosophical problems such as the problem of free will the problem of evil the problem of human uniqueness and empathy it demonstrates how the problem of time also has its place here for many people the world includes ultimate reality hence the book provides an analysis and evaluation of different relationships between human beings and ultimate reality god the book presents an answer to the philosophical problem of how one could understand divine action in the world

in social animals perturbations may trigger specific behavioural responses with consequences for dispersal and complex population dynamics perturbations raise the need for information gathering in order to reduce uncertainty and increase resilience updated information is then shared within the group and social behaviours emerge as a self organized process this social information factoralizes with the size of the group and it is finally used for making crucial decisions about for instance when to leave the patch and where to go indeed evolution has favoured philopatry over dispersal and this trade off is challenged by perturbations when perturbations accumulate over time

they may decrease the suitability of the patch and erode the philopatric state until crossing a tipping point beyond which most individuals decide to disperse to better areas initially the decision to disperse is led by a few individuals and this decision is copied by the rest of the group in an autocatalytic way this feedback process of social copying is termed runaway dispersal furthermore social copying enhances the evolution of cultural and technological innovation which may cause additional nonlinearities for population dynamics social information gathering and social copying have also occurred in human evolution especially after perturbations such as climate extremes and warfare in summary social feedback processes cause nonlinear population dynamics including hysteresis and critical transitions from philopatry to patch collapses and invasions which emerge from the collective behaviour of large ensembles of individuals

a christian answer to the identity angst of our culture in the 21st century west identity is everything never has it been more important culturally speaking to know who you are and remain true to yourself expressive individualism the belief that looking inward is the way to find yourself has become the primary approach to identity formation and questioning anyone's self made self is often considered a threat or attack prompted by his own past crisis of identity brian rosner challenges the status quo by arguing that while knowing yourself is of some value it cannot be the sole basis for one's identity he provides an approach to identity formation that leads to a more stable and satisfying sense of self this approach looks outward to others acknowledging that we are social beings and looks upward to god to find a self who is intimately known and loved by him how to find yourself equips readers from a variety of backgrounds to engage sympathetically with some of the most pressing questions of our day challenges the status quo examines and critiques expressive individualism the leading strategy for identity formation gospel centered identifies an approach to identity formation in jesus's life story and god's personal knowledge of his children accessible helpful for a wide audience of laypeople students and church leaders foreword by carl r trueman opens with a message from the author of the rise and triumph of the modern self

this is the happiest story you will ever read it's about two people who led wonderfully fulfilling successful lives the odd thing was they weren't born geniuses they had no extraordinary physical or mental gifts nobody would have picked them out at a young age and said they were destined for greatness how did they do it

what kind of social animal are we a provocative and stimulating answer

in this 1980 volume friends and former pupils of Walter Ullmann contribute essays on subjects originally studied under his supervision

Volumes 1-10 include records of meteorological observations taken at the observatory of the Birmingham and Midland Institute 1891-1896
