the being and event trilogy is the philosophical basis of alain badiou's entire oeuvre it is formed of three major texts which constitute a kind of metaphysical saga being and event 1988 logics of the worlds 2006 and finally the immanence of truths which he has been working on for 15 years the new volume reverses the perspective adopted in logics of worlds where in that book badiou saw fit to analyze how truths qua events appear from the perspective of particular worlds that by definition exclude them in the immanence of truths badiou asks instead how the irruption of truths transforms the worlds within which they by necessity must arise an emphasis on regularity and continuity has given way to an attempt one unquestionable in its philosophical power and implications to formalize rupture and reconfiguration the being and event trilogy is a unique and ambitious work that reveals how truths can be at once context specific and universal situational and eternal
