this book a guide and companion to the prehistoric archaeology of greece is designed for students travelers and all general readers interested in archaeology greece has perhaps the longest and richest archaeological record in europe and this book reviews what is known of greece from the earliest inhabitants in the stone age to the end of the bronze age and the collapse of the minoan and mycenaean civilizations the book describes the prehistoric cultures of greece in chronological order and illustrates with 98 detailed drawings each culture s typical artifacts architecture burial customs and art written in an informal and accessible style free of scientific jargon the book can be used in the classroom or as a guide for the traveler or read simply for pleasure by anyone with a curiosity about the earliest ages of this fascinating region although intended for a wide audience the book has a solid scientific foundation the authors are professional archaeologists with more than 25 years of experience in the field and with a first hand knowledge of the methods and results of contemporary research there is no other book today that covers the same range of periods and subjects making it essential reading for anyone interested in the early civilizations that shaped the greek landscape laid the foundations for classical greek civilization and contributed in many ways to the formation

of the modern greek world the authors have been careful to address the many questions concerning prehistoric greece that have been asked them by students and visitors to greece through the years the illustrations were created especially for this book showing familiar artifacts and sites from a new perspective and selecting others for illustration that rarely if ever appear in popular publications

the chapters in this edited volume present multi disciplinary case studies of prehistoric archaeological sites located on now submerged portions of the continental shelf each chapter represents an extension of the known prehistoric record beyond the modern shoreline case studies represent central themes of landscape change climate change and societal development using new technologies for mapping monitoring and managing these sites

this fascinating volume on submerged prehistoric landscapes of the north sea brings together for the first time comparative archaeological evidence from norway denmark germany netherlands and the uk the reports describe a range of submerged sites and artefacts occupied or used during the late pleistocene and early holocene periods of glacially controlled low sea level when large areas of the north west european continental shelf were dry land they show that palaeolithic mesolithic and neolithic peoples created settlements on the contemporaneous coastlines at periods of low sea level and probably in the hinterlands of the central north sea sometimes known as doggerland the age of most known submerged sites is in the range of 8000 5000 years ago but older submerged sites have been discovered outside the north sea region as well as recording existing findings the contributions analyse the potential for prehistoric archaeology research on the floor of the north sea and plan those subjects most requiring study the volume also recommends ways to cooperate across national boundaries and with industry on future research and protection of prehistoric sites on the sea floor

grahame clark s book examines the development of prehistoric archaeology at cambridge and the achievements of its graduates placing this theme against the background of the growth of archaeology as an academic discipline worldwide prehistory in cambridge began to be taught formally in 1920 and emerged as a full tripos soon after the second world war from the outset it focused on the aims and methods of archaeological research providing in addition for combinations of study options ranging from early prehistory to the archaeology of the major civilisations of the old world and the protohistory of northern europe the measure of its success is shown by the achievement of cambridge graduates at home and overseas in both the study and the field a significant outcome of their work has been the widespread recognition of archaeology as a subject of broad educational value not merely for undergraduates but for human beings the world over

dorothy garrod opened many doors not only was she the first female professor at cambridge university but she illuminated and in some cases initiated some of prehistoric archaeology s most central issues the quiet yet self possessed woman was best known as a fieldworker often venturing into dangerous regions such as kurdistan her first and highly successful excavation revealed fragments of neanderthal fossils in gibraltar this volume reviews modern research on this site as well as exploring other issues which interested the disney professor of archaeology hominid remains from mount carmel palaeolithic sites in the zagros mountains bulgaria and britain and the cultural evidence for the beginning of near eastern food production which garrod called natufian also included are papers concerned with her life background and published work the topics span and continuing relevance are testament to dorothy garrod s remarkable character and great achievements

modern borders of all kinds political geographical and social effect the kinds of prehistoric

narratives archaeologists can write borders that dominate today did not exist in prehistory this volume works across such borders and focuses specifically on the region between the rivers forth and tyne an area divided by the modern political border between scotland and england the introduction and opening chapters consider the impact of the anglo scots and similar borders on our understanding of prehistoric patterns of activity the introduction also asks whether when and to what extent this could be considered a coherent region in the prehistoric past further chapters explore the history of research in the region including field survey and aerial photography another nine chapters discuss the results of recent research including new and older excavations or conduct regional analyses of artefacts and mortuary practices starting with the late upper palaeolithic and continuing with studies from the early neolithic through to the late iron age taken as a whole the publication suggests that while there was no coherent tyne forth region in prehistory except for perhaps in the late iron age research at this regional scale provides a strong basis for appreciating past cultural interaction at a variety of scales from publisher s website

thirteen papers providing a comprehensive review of jordanian prehistory from the lower paleolithic to the late neolithic many come from recently completed research projects prior to their final publication the lower paleolithic corrairie copeland the middle paleolithic donald o henry the early and middle epipaleolithic brian f

margarita diaz andreu offers an innovative history of archaeology during the nineteenth century encompassing all its fields from the origins of humanity to the medieval period and all areas of the world the development of archaeology is placed within the framework of contemporary political events with a particular focus upon the ideologies of nationalism and imperialism diaz andreu examines a wide range of issues including the creation of institutions the conversion of the study of antiquities into a profession public memory changes in archaeological thought and practice and the effect on archaeology of racism religion the belief in progress hegemony and resistance

a collection of eighteen original essays which discusses the prehistoric archaeology of southwest ireland from the earliest human settlement to the beginnings of the iron age

regional identities and practices are often debated in american archaeology but middle atlantic prehistorians have largely refrained from such discussions focusing instead on creating chronologies and studying socio political evolution from the perspective of sub regions what is middle atlantic prehistoric archaeology what are the questions and methods that identify our practice in this region or connect research in our region to larger anthropological themes middle atlantic prehistory foundations and practice provides a basic survey of middle atlantic prehistoric archaeology and serves as an important reference for situating the development of middle atlantic prehistoric archaeology within the present context of culture area studies this edited volume is a regional historic overview of important themes topics and approaches in middle atlantic prehistory covering major practical and theoretical debates and controversies in the region and in the discipline each chapter is holistic in its review of the historical development of a particular theme in evaluating its contributions to current scholarship and in proposing future directions for productive scholarly work contributing authors represent the full range of professional practice in archaeology and include university professors cultural resources professionals government regulatory review archaeologists and museums curators with many years of practical and theoretical immersion in his her chapter topic and is highly regarded in the discipline and in the region for their expertise middle atlantic prehistory provides a much needed synthesis and historical overview for academic and cultural resource archaeologists and independent scholars working in the middle atlantic region in particular
