this history based on an exhaustive study of german records explores the battle of britain through the eyes of the luftwaffe over the past 80 years histories of the battle of britain have consistently portrayed the feats of the few as they were immortalized in churchill s famous speech as being responsible for the raf s victory in the epic battle however this is only part of the story the results of an air campaign cannot be measured in terms of territory captured cities occupied or armies defeated routed or annihilated successful air campaigns are those that achieve their intended aims or stated objectives victory in the battle of britain was determined by whether the luftwaffe achieved its objectives the luftwaffe of course did not and this detailed and rigorous study explains why analysing the battle in its entirety in the context of what it was history s first independent offensive counter air campaign against the world s first integrated air defence system douglas c dildy and paul f crickmore set out to re examine this remarkable conflict presenting the events of the battle of britain in the context of the luftwaffe s campaign and raf fighter command s battles against it this title is a new and innovative history of the battle that kept alive the allies chances of defeating nazi germany

the myth that alec issigonis conceived the mini is just one whisp of the smoke screen that

obscures the untold story of post war britains greatest industrialist this is more than a motoring story you will find commentary on life in the first half of the 20th century as you explore the drama of one mans determination to overcome adversity someone who shot from the hip as no other tycoon this is a tale of political and military intrigue of spectacular business acumen of bitter violent industrial conflict an account of savage jealousies and sexual intrigue to record the life of leonard lord the author has visited a vast number of sources in recent times some have sought to implant the roots of the british motor industrys ills and ultimate collapse in the policies of leonard lord this is both disingenuous and unjust this for the first time is his story

when the first world war ended the then recently established royal air force was awash with aircraft of all descriptions more surprising perhaps was the fact that despite an ongoing cull of obsolescing types on the last day of 1919 the raf still possessed 9 122 non obsolete aircraft with a further 1 100 more assigned to the fleet air arm while the famous se 5a and sopwith camel had by this time largely been consigned to history the raf possessed no less than 1 860 sopwith snipes which from 1920 would become the raf s standard single seat fighter for years to come other core types on charge on 31 december 1919 included some 1 650 bristol f 2b fighters and 1 250 de havilland dh 9as which together with the snipe accounted for over fifty per cent of the raf s inventory at that time avro 504 training aircraft accounted for a further 2 700 airframes in this flight craft special the authors provide a detailed and informative pictorial history of those scout fighter aircraft that served in an operational capacity with the raf from january 1920 until the last day of 1939 a period in which britain once again moved from an era of peace to war with an old enemy albeit this time hitler s totalitarian national socialist germany as opposed to the imperial germany of old as well as covering each of the fighter types used during the inter war period and featuring most of the squadrons the photographs themselves convey the sense of the technical advances that rapidly took root within britain s aero industries from the mid 1930s onwards moving from the brightly marked overall silver wood and linen biplanes to the dull camouflaged metal skinned monoplanes the progression of machine gun development from the lewis and vickers of the first world war to the later browning is covered spanning the days of the biplanes two fixed synchronised lewis or vickers 303 inch machine guns mounted in the forward fuselage to eight wing mounted 303 inch browning machine guns in the new monoplane fighters there is also a small but fascinating section on the monoplane also rans the monoplane fighters that were designed and had prototypes built but failed to reach the finishing post

this title first appeared in 2001 to universal acclaim quickly went out of print and has remained so since the author meantime has continued his research and the result is this updated edition over half as long as the first with stacks of new photographs absolutely essential reference for all those interested in military aviation
