how can human beings kill or brutalise multitudes of other human beings focusing particularly on genocide erwin staub explores the psychology of group aggression he sketches a conceptual framework for the many influences on one group s desire to harm another and within this framework considers four historical examples of genocide

evil is the most serious of our moral problems all over the world cruelty greed prejudice and fanaticism ruin the lives of countless victims outrage provokes outrage millions nurture seething hatred of real or imagined enemies revealing savage and destructive tendencies in human nature understanding this challenges our optimistic illusions about the effectiveness of reason and morality in bettering human lives but abandoning these illusions is vitally important because they are obstacles to countering the threat of evil the aim of this book is to explain why people act in these ways and what can be done about it john keke the first part of this book is a detailed discussion of six horrible cases of evil the albigensian crusade of about 1210 robespierre s terror of 1793 94 franz stangl who commanded a nazi death camp in 1943 44 the 1969 murders committed by charles manson and his family the dirty war conducted by the argentinean military dictatorship of the late 1970s and the activities of a psychopath named john allen who recorded reminiscences in 1975 john kekes includes these examples not out of sensationalism but rather to underline the need to hold vividly in our minds just what evil is the second part shows why in kekes s view explanations of evil inspired by christianity and the enlightenment fail to account for these cases and then provides an original explanation of evil in general and of these instances of it in particular

people have long imagined themselves as rooted creatures bound to the earth and nations from which they came in rootedness christy wampole looks toward philosophy ecology literature history and politics to demonstrate how the metaphor of the root surfacing often in an unexpected variety of places from the family tree to folk etymology to the language of exile developed in twentieth century europe wampole examines both the philosophical implications of this metaphor and its political evolution from the root as home to the root as genealogical origin to the root as the past itself rootedness has survived in part through its ability to subsume other compelling metaphors such as the foundation the source and the seed with a focus on this concept s history in france and germany wampole traces its influence in diverse areas such as the search for the mystical origins of words land worship and nationalist rhetoric including the disturbing portrayal of the jews as an unrooted and thus unrighteous people exploring the works of martin heidegger simone weil jean paul sartre paul celan and many more rootedness is a groundbreaking study of a figure of speech that has had wide reaching and at times dire political and social consequences
