this book uses a range of s t and structural indicators to analyse the transfonnation process in particular the transfonnation of science technology and industry in the fonner communist countries the book originates from a sense of the tremendous need for quantitative indicators for assessing trends and perfonnance in the post socialist economies s t systems in the region have passed through the first phase of rapid deterioration or as it is called by some analysts implosion after ten years of transfonnation we are witnessing a process of increasing differentiation of these countries in tenns of general patterns of growth and structural change as well as specific lines of restructuring in their s t systems the question of sources of growth or indeed of stagnation is an increasingly urgent one from both the policy and academic perspectives in that context there is a pressing need for in depth assessment of restructuring patterns in science technology and industry in the region as a basis for understanding how restructuring in s t is linked to industrial restructuring and to general economic and social transfonnation as the contributions to this volume show there is now a critical mass of quantitative data across the post socialist countries which deserves to be studied more thoroughly in a comparative manner the changes of the last ten years have produced varying patterns of adjustment which are now clearly visible in s t and structural indicators

inclusive growth full employment and structural change implications and policies for developing asia discusses policies to achieve inclusive growth in developing

asia including agriculture investment certain state interventions monetary fiscal and the role of the state as employer of last resort felipe argues that full employment of the labor force is the key to delivering inclusive growth full employment is the most direct way to improve the well being of the people especially of the most disadvantaged since unemployment and underemployment are pervasive in many parts of the region asian leaders must commit to the goal of full employment the book also analyzes the region s phenomenal growth in recent decades in terms of structural transformation accelerating it is vital for the continued growth of developing asia but efforts to achieve full employment might be held back given that structural transformation requires massive labor shifts across sectors and these are difficult to coordinate moreover the goal of full employment was abandoned in the 1970s and governments and central banks have since concentrated on keeping inflation low

this book explores the macroeconomic changes in chilean economics complementing this with detailed sectoral evaluation and an analysis of the impacts at regional level evidence suggests a need to explore the degree to which economic development has or has not contributed to reducing disparities in level of welfare across the country
