the world was quietly going about its normal business when late in 2019 the entire
global world of 195 countries even china was turned completely on its head by a
fake virus and a fake pandemic however the world was not to know at the time and
for the most part still does not know until the publication of this book that the
entire chapter and verse of the virus paradigm called sarscov2 and its ensuing
ailment covid19 and its pandemic were all total lies and fake lies and fake
propagated by hidden persons and their nominated puppets in mostly unelected
globalist organisations beyond the reach of sovereign states who wef un world
bank etc who in reality control the world consequently in early 2020 and the
following months through to 2021 there was a world wide nightmare that no one
seemed to fully understand or indeed understand at all this nightmare was known

variously as coronavirus sars cov2 and covid19 coronaviruses can cause mild disease similar to a common cold sars cov2 severe acute respiratory syndrome coronavirus 2 was claimed to be a novel new coronavirus and the illness covid19 was supposedly caused by sars cov2 mass induced dystopian nightmare the dystopian nightmare had only just begun and was to last almost two full years 2020 2022 horrible images appeared from china not the most democratic country in the world then from italy and other countries until world wide preposterous projections of not to happen global deaths based on very flawed computer models were bandied about to an unknowing mass of a very frightened and unfortunately deliberately ill informed global population global mass media fanned the flames morning day and night for many months on end inappropriate quarantine measures were globally in lockstep imposed that restricted human movement to an inhuman level that people were not permitted to see their loved ones when their loved ones were dying in hospitals and care homes the world was a surreal dystopian horror story police vans patrolling the street at night complete lockdown and no one allowed outside except for one hours walk per day no gatherings greater than six empty streets closed and boarded shops empty parks and empty beaches draconian civil rights restrictions were imposed the global economic and social life the world over were about to fall into total collapse on what data were these extreme measures taken was the world really under such a massive threat that we had to close down global capitalism for 2 years had the benefits of these very severe measures been adequately assessed against the damage that they would also no doubt cause to the global economy and to individual person s lives throughout the world no they had not they were simply imposed globally without recourse to any open debate or serious risk analysis medico totalitarianism strode the world like a great dictator with all debate and opposition silenced by the baying mob of puppet mainstream media until the publication of this book covid compensation shocking truth revealed by the finest independent scientific medical and legal minds in the world

governance and the hegemony of financial stability from financial crisis to climate emergency explains how the handling of the global financial crisis has redefined the relations of politics and financial markets and how the then established hegemony of financial stability still dominates responses to current challenges particularly climate change the book argues that within the years of crisis management a hegemony of financial governance evolved that accepts the financial system as being intrinsically crisis laden and potentially disastrous for broader notions of welfare and social security the book traces how this framework redefined state market relations expanded technocratic authority and extended

into new domains including climate policy where climate risks are reframed as threats to financial stability by analysing the work of a transnational epistemic community of central bankers regulators and financial stability experts it analyses how post crisis governance operates through risk management surveillance and resilience building it captures how political and financial rationalities co evolved towards a hegemony that seeks to contain crises without addressing their root causes and thus prevents more transformative changes the book will appeal to scholars of political science economic sociology international relations international political economy as well as security finance and economics

a fortnightly bulletin on financial and political trends

this is the first comprehensive practical handbook on the topic of environmental social governance esg and its impact on the real estate industry the sustainability megatrend is still in its early stages in the real estate sector and there is a lack of standards practical examples and data the development is very dynamic and sometimes confusing and new complex requirements and regulations are constantly being added the authors an expert team of economists lawyers investors asset managers and engineers provide an overview of national and european regulatory requirements as well as current market developments they show what role esg plays not only in the areas of new construction renovation and real estate management but also in investment processes and real estate valuations contents esg and the real estate market esg and regulatory environment esg and real estate management esg in urban and project development

the science of informatics in the broadest sense has been several thousands of years in the making with the recent emergence of large storage devices and high speed processing of data it has become possible to organize vast amounts of data as digital products with ontologic tags and concepts for smart queries coupling this computational capability with earth science data defines the emerging field of geoinformatics since the science of geology was established several centuries ago observations led to conclusions that were integrative in concept and clearly had profound implications for the birth of geology as disciplinary information about earth becomes more voluminous the use of geoinformatics will lead to integrative science based discoveries of new knowledge about planetary systems twenty one research papers co authored by 96 researchers from both earth and computer sciences provide the first ever organized presentation of the science of informatics as it relates to geology readers will readily recognize the vast intellectual content
