this essay sheds light on what is the product development process identifies the stages of the product development process explicates the benefits of companies developing new products and demystifies the problems with companies not developing new products succinctly stated the product development process refers to all of the stages of the product development process which commences with the idea generation stage and ends with the commercialization stage the product development process is inclusive of all the stages that the product goes through from its inception in the chasms of the human mind as a product concept to its release in retail stores the product development process can vary from product to product the product development process is a far less long winded process for simple digital products and is a significantly more long winded process for intricate tangible products even though not every product has to go through all the stages of the product development process to be released in the market such as a song being released in the market for commercial purpose after it has been developed without it having received feedback from stakeholders before it was released in the market most tangible products however go through a long winded product development process it is easier to release a digital product such as a digital course digital song or mobile application then it is to release a tangible product this is because there are typically no upfront costs associated with releasing digital products on digital distribution platforms if you do not own a digital distribution platform and if your digital products earn product unit sales

on a digital distribution platform then you will typically need to be pay the company who owns the digital distribution platform a percentage of the sales revenue that was generated on its digital distribution platform from your product unit sales it is an extraordinarily lucrative business model to own a digital distribution platform since it allows the company who owns the digital distribution platform to reap a percentage of the sales revenue every time digital products generate product unit sales on its digital distribution platform since the company who owns the digital distribution platform did not develop the digital products that are available for sale on its digital distribution platform it is able to have an exorbitant amount of product offerings available for sale on its digital distribution platform without even having to had expended research and development dollars to be able to do so since entrepreneurs develop the products that are available for sale on digital distribution platforms entrepreneurs incur the product development costs to be able to bring their products to fruition it can take a tremendous amount of time and capital to develop products companies who own a digital distribution platform have a vast variety of product offerings on their digital distribution platform and are able to not only reap a percentage of the sales revenue every time digital products that they did not develop sell on their digital distribution platform but are also able to sell these products without having to had expended capital to develop these digital products in stark contrast to retailers who own brick and mortar retail stores and who have enormous inventory carrying costs companies who own a digital distribution platform do not have any inventory carrying costs since their product offerings are digital products it is significantly easier to develop digital products and expeditiously commercialize them than it is to develop tangible products and release them in the market at retail brick and mortar retail stores copies of digital products can easily be distributed to customers via a digital distribution platform and are summarily accessible on their devices after the customers order them on the other hand copies of tangible products need to be manufactured and subsequently shipped out to customers so that orders for tangible products can be fulfilled it is time consuming for products to go through the ample stages of the product development process the product development process commences with ideation with the product

being relegated to the form of a product concept in the bowels of the human mind the product development process ends with a product launch in which the product is released in the market the product development process sheds light on how a product is developed

there s some great news which is you don t have to be super creative to produce your own unique product you may always do what so many others do and that s to upgrade something that exists or make it greater and better it you may produce a product mash up and produce something over your own example you ve some particular issue or subject and you have 3 or 4 ebooks on that issue you may simply take ideas from all these ebooks and produce your own you don t copy but instead learning from them and making a product of your own that lets in your own ideas analysis and data the thing here is that you re handling these research products as a commencing point to get ideas so that it becomes simple for you to work with your own product there s an unbelievable amount of ideas simply sitting all over the place so do keep an awareness if you re going to build a product then it s in your best interest to make a high quality product holding useful info your first product regardless what you do will always take the longest and feel like the hardest given here are hints that will help you in that field there are a lot of advantages to writing ebooks but the experience is priceless authoring something so involved is truly worth the time and effort not simply for apportioning your knowledge but for the feedback you get from those who read it all the same when most individuals begin to think about composing an entire ebook they make the error of believing it will be complicated the key component for success with any ebook is authoring it and presenting it the right way to your intended audience
