despite messiaen's position as one of the greatest technical innovators of the twentieth century his musical language has not been comprehensively defined and investigated the composer's 1944 theoretical study *the technique of my musical language* expounds only its initial stages and while his posthumously published *traité de rythme de couleur et d'ornithologie* contains detailed explanations of selected techniques in most cases the reader is left to define these more precisely by observing them in the context of messiaen's analyses of his own works technical processes are nevertheless in many cases the primary components of a work or movement for instance *personnages* dominate *joie du sang des étoiles* from the *turangafla* symphonie and in certain cases such as *l'échange* from the *vingt regards sur l'enfant jésus* the process asymmetric augmentation is the only structuring element present given this reliance on idiosyncratic techniques clear comprehension of the music is impossible without a detailed knowledge of messiaen's methods garth healey charts their development and interconnections considers their relationship with formal structures and applies them in refined and extended form to works for which messiaen himself left no published analysis
