modern economies must grow because money borrowed for investment can be repaid only by expanding production and consumption to meet the burden of usurious rates of interest the roots of this dynamic between debt and growth lay in the financial revolution of the late seventeenth and early eighteenth centuries in britain which established a new usurious monetary system for the first time in history credit was made widely available but only on condition of an exponentially increasing debt burden to pay back debts production had to increase correspondingly leading to the industrial revolution economic growth and modernity itself though private creditors gained a monopoly over the creation of credit and were disproportionately enriched the resulting economic growth for a time was great enough to benefit most debtors as well as creditors ensuring widespread prosperity that is no longer the case with today s eco crisis we have reached the limits of growth we no longer have the natural resources to grow fast enough to pay our debts this is the real root of our current financial crisis if we are to live sustainably our system of money and credit must be transformed we need a non usurious monetary system appropriate to a steady state economy with capital broadly distributed at non usurious rates of interest such a system was developed by an early nineteenth century american thinker edward kellogg and is explored here in depth his work inspired the populist movement and remains more relevant than ever as a viable alternative to the a financial system we can no longer afford
