this edited volume presents an interdisciplinary collection of texts that examine the practice of gamification the use of game design elements in non game contexts specifically as an organization and management research problem as we travel deeper into the twenty first century it is becoming increasingly clear the late modernity is re defining its take on games and play following what has been termed a general ludification or playification of society corporations are beginning to see games and play as resources rather than as a wasteful practice we are witnessing the emergence of the practice of gamification with the intention of mobilizing play s motivational power for capitalist production this book outlines both the essential how tos and also critically explores their links to diverse strands of organization theory such as institutionalism business ethics critical theory and organizational behavior gamification research has been mostly conducted within disciplines such as information studies game studies and information systems science this is a paradoxical state of affairs whilst gamification aims at being a transformative intervention in work processes and practices and is being deployed as such by practitioners this book will be of value to researchers academics and

students interested in management and organization studies

pictures are a medium that helps make the past tangible and preserve memories without context they are not able to do so pictures are brought to life by their associated stories however the older pictures become the fewer contemporary witnesses can tell these stories especially for large analog picture archives knowledge and memories are spread over many people this creates several challenges first the pictures must be digitized to save them from decaying and make them available to the public since a simple listing of all the pictures is confusing the pictures should be structured accessibly second known information that makes the stories vivid needs to be added to the pictures users should get the opportunity to contribute their knowledge and memories to make this usable for all interested parties even for older less technophile generations the interface should be intuitive and error tolerant the resulting requirements are not covered in their entirety by any existing software solution without losing the intuitive interface or the scalability of the system therefore we have developed our digital picture archive within the scope of a bachelor project in cooperation with the bad harzburg stiftung for the implementation of this web application we use the ui framework react in the frontend which communicates via a graphql interface with the content management system strapi in the backend the use of this system enables our project partner to create an efficient process from scanning analog pictures to presenting them to visitors in an organized and annotated way to customize the solution for both picture delivery and information contribution for our target group we designed prototypes and evaluated them with people from bad harzburg this helped us gain valuable insights into our system s usability and future challenges as well as requirements our web application is already being used daily by our project partner during the project we still came up with numerous ideas for additional features to further support the exchange of knowledge

the rails framework empowers developers with unprecedented levels of productivity by embracing principles such as convention over configuration and don t repeat yourself this paradigm is even apparent at the community level where developers regularly share their custom framework extensions by way of rails plugins feature plugins offer a way for

developers to extend the core rails framework with their own custom features allowing for rapid integration of features such as authentication user ratings and search practical rails plugins shows you how to capitalize upon the wide variety of plugins at your disposal by guiding you through their integration into a number of interesting projects you ll learn how to rapidly augment projects involving asynchronous video transcoding geocoding and mapping content management community ratings and pdf generation you ll also learn how to create and distribute your own plugins the ultimate guide to building powerful web sites faster using rails plugins demonstrates how to use popular plugins within a number of practical and fully functional projects and mini applications shows you how to create and distribute your own plugins
