pictures are a medium that helps make the past tangible and preserve memories without context they are not able to do so pictures are brought to life by their associated stories however the older pictures become the fewer contemporary witnesses can tell these stories especially for large analog picture archives knowledge and memories are spread over many people this creates several challenges first the pictures must be digitized to save them from decaying and make them available to the public since a simple listing of all the pictures is confusing the pictures should be structured accessibly second known information that makes the stories vivid needs to be added to the pictures users should get the opportunity to contribute their knowledge and memories to make this usable for all interested parties even for older less technophile generations the interface should be intuitive and error tolerant the resulting requirements are not covered in their entirety by any existing software solution without losing the intuitive interface or the scalability of the system therefore we have developed our digital picture archive within the scope of a bachelor project in cooperation with the bad harzburg stiftung for the implementation of this web application we use the ui framework react in the frontend which communicates via a graphql interface with the content management system strapi in the backend the use of this system enables our project partner to create an efficient process from scanning analog pictures to presenting them to visitors in an organized and annotated way to customize the solution for both picture delivery and information contribution for our target group we designed prototypes and evaluated

them with people from bad harzburg this helped us gain valuable insights into our system s usability and future challenges as well as requirements our web application is already being used daily by our project partner during the project we still came up with numerous ideas for additional features to further support the exchange of knowledge
